

Report on the Chinese LED Market 2019-2023

https://marketpublishers.com/r/R3C0D935AA7EN.html Date: August 2019 Pages: 269 Price: US\$ 5,000.00 (Single User License) ID: R3C0D935AA7EN

Abstracts

It takes 3-5 business days to dispatch the report after the purchase is made.

The LED lighting industry makes use of LED chip technology and combines knowledge from the fields of optics, thermology, machinery, electronics, power distribution and precision manufacturing amongst others to create lighting products for everyday use. LED lighting products offer improvements in every way over traditional filament lighting products, some of which include improved efficiency, ease of use and longevity.

The LED industry possesses a complete industry chain with many different segments for LED chips, packaging, LED wafers and applications. LED wafers and chips are produced in the upstream part of the chain while LED packaging is situated midstream. LED monitors, lighting and backlights are part of the downstream part of the chain.

The global LED chip market reached a total value of XX billion USD in 2018, while the LED packaging market recorded an output value of XX billion USD. The applied LED lighting market reached a scale of XX billion USD.

The Chinese LED lighting industry reached a scale of XX billion CNY in 2019, a XX% growth over the previous year. The upstream, midstream and downstream parts of the supply chain each achieved a scale of XX, XX and XX billion CNY each.

The 13th five-year plan amongst other beneficial policies are expected to be a great source of growth in the industry, and as a result the Chinese LED industry is expected to reach a scale of XXX billion CNY in 2023.

Contents

CHAPTER 1 LED INDUSTRY

- 1.1 LED lighting industry
- 1.1.1 LED lighting industry overview
- 1.1.2 LED industry developments
- 1.1.3 LED supply chain analysis
- 1.1.4 LED product manufacturing process
- 1.1.5 LED components and mechanics
- 1.1.6 LED lighting factors
- 1.2 EPI wafer
- 1.2.1 EPI wafer growth
- 1.2.2 EPI wafer manufacturing process
- 1.2.3 EPI wafer materials
- 1.2.4 EPI wafer technological development trends
- 1.3 LED chips
- 1.3.1 LED chips
- 1.3.2 Manufacturing process introduction
- 1.4 LED packaging
 - 1.4.1 LED packaging
 - 1.4.2 LED packaging technology

CHAPTER 2 LED INDUSTRY DEVELOPMENT BACKGROUND ANALYSIS

- 2.1 Economic circumstances
 - 2.1.1 Chinese GDP growth
 - 2.1.2 Industrial economy developments
 - 2.1.3 Social fixed asset investments
 - 2.1.4 Consumables retail figures
 - 2.1.5 Citizen income growth analysis
 - 2.1.6 Citizen consumption price changes
- 2.1.7 Foreign trade developments
- 2.2 Social environment analysis
 - 2.2.1 Population analysis
 - 2.2.2 Urbanization rate
- 2.3 Industry policies analysis
- 2.3.1 LED industry authorities
- 2.3.2 LED industry regulations and policies

2.3.3 LED industry standards

CHAPTER 3 INTERNATIONAL AND DOMESTIC LED MARKET OVERVIEW

- 3.1 International LED industry development overview
- 3.2 International LED industry regional characteristics
- 3.3 International LED chip industry development overview
- 3.4 International LED packaging industry development overview
- 3.5 International LED application industry development overview
- 3.6 International LED industry development trends analysis

CHAPTER 4 MAIN INTERNATIONAL LED MARKETS

- 4.1 US LED industry
 - 4.1.1 US LED lighting industry policies
 - 4.1.2 US LED lighting industry development model
 - 4.1.3 US LED lighting industry development overview
 - 4.1.4 US LED lighting industry development experiences
- 4.2 Japanese LED industry
- 4.2.1 Japanese LED lighting industry policies
- 4.2.2 Japanese LED lighting industry development models
- 4.2.3 Japanese LED lighting industry development
- 4.2.4 Japanese to accelerate development of LED lighting

4.3 Korean LED industry

- 4.3.1 Korean LED lighting industry policies
- 4.3.2 Korean LED lighting industry development models
- 4.3.3 Korean LED lighting industry development overview
- 4.3.4 Korean LED lighting industry current development trends
- 4.4 Taiwanese LED industry
 - 4.4.1 Taiwanese LED industry development analysis
 - 4.4.2 Taiwanese LED lighting industry policies
- 4.4.3 Taiwanese LED lighting industry development models
- 4.4.4 Taiwanese LED lighting industry market size
- 4.4.5 Taiwanese LED companies' operational status

CHAPTER 5 KEY INTERNATIONAL LED COMPANIES

- 5.1 Cree Inc.
 - 5.1.1 Development overview

- 5.1.2 Main products
- 5.1.3 Operational status
- 5.1.4 Competitive advantages
- 5.1.5 Operational status in China
- 5.2 OSRAM
 - 5.2.1 Development overview
 - 5.2.2 Main products
 - 5.2.3 Operational status
 - 5.2.4 Competitive advantages
 - 5.2.5 Operational status in China
- 5.3 Philips
 - 5.3.1 Development overview
 - 5.3.2 Main products
 - 5.3.3 Operational status
 - 5.3.4 Competitive advantages
 - 5.3.5 Operational status in China
- 5.4 Nichia
 - 5.4.1 Development overview
 - 5.4.2 Main products
 - 5.4.3 Latest development trends
 - 5.4.4 Operational status in China
- 5.5 Seoul Semiconductors
 - 5.5.1 Development overview
 - 5.5.2 Main products
 - 5.5.3 Operational status
- 5.5.4 Operational status in China
- 5.6 VEECO
 - 5.6.1 Development overview
 - 5.6.2 Main products
 - 5.6.3 Operational status
 - 5.6.4 Competitive advantages
 - 5.6.5 Operational status in China
- 5.7 AIXTRON
 - 5.7.1 Development overview
 - 5.7.2 Main products
 - 5.7.3 Operational status
 - 5.7.4 Competitive advantages
 - 5.7.5 Sales network

CHAPTER 6 CHINESE LED LIGHTING MARKET

- 6.1 Chinese LED lighting industry analysis
- 6.2 Chinese LED upstream chip production analysis
- 6.2.1 LED chip categories
- 6.2.2 LED chip localization analysis
- 6.2.3 LED chip production value
- 6.2.4 LED chip company development analysis
- 6.3 Chinese LED midstream packaging industry analysis
- 6.3.1 LED packaging and product categorization
- 6.3.2 LED packaging technology characteristics
- 6.3.3 LED packaging industry development analysis
- 6.3.4 LED packaging industry value
- 6.3.5 LED packaging company development analysis
- 6.4 Chinese LED downstream application market analysis
- 6.4.1 LED application industry developments
 - 6.4.1.1 Rising penetration rates for LED lighting
 - 6.4.1.2 Energy conservation needs boosting market growth
- 6.4.1.3 Varied LED demands
- 6.4.2 LED applications industry value analysis
- 6.4.3 LED application companies' development analysis

CHAPTER 7 CHINESE LED MARKET COMPETITION AND INVESTMENT

- 7.1 Chinese LED market competitive analysis
 - 7.1.1 LED lighting industry competitive advantage analysis
 - 7.1.2 LED industry regional competitive analysis
 - 7.1.3 LED industry main regions
 - 7.1.3.1 Yangtze River delta competitive analysis
 - 7.1.3.2 Pearl River delta competitive analysis
 - 7.1.3.3 Fujian and Jiangxi competitive analysis
 - 7.1.3.4 Northern regions competitive analysis
- 7.2 Chinese LED lighting industry competitive analysis
 - 7.2.1 Current corporations' competitive analysis
 - 7.2.2 Threat of new entrants
 - 7.2.3 Threat of substitutes
 - 7.2.4 Supplier bargaining power
 - 7.2.5 Consumer bargaining power
- 7.3 Foreign-invested companies in China

- 7.3.1 Foreign-invested company distribution
- 7.3.2 Foreign-invested companies' investments in China
- 7.4 Chinese LED industry mergers and acquisitions

CHAPTER 8 CHINESE LED APPLICATIONS MARKET ANALYSIS

- 8.1 Chinese LED applications analysis
- 8.2 Chinese LED general lighting market analysis
- 8.2.1 LED general lighting market developments
- 8.2.2 LED general lighting market share is growing at a rapid pace
- 8.2.3 LED general lighting market share analysis
- 8.2.4 LED general lighting market size analysis
- 8.2.5 LED general lighting development prospects and trends
- 8.3 Chinese LED landscape lighting market analysis
- 8.3.1 LED applications in landscape lighting
- 8.3.2 Advantages of LED landscape lighting
- 8.3.3 Application of LED landscape lighting at night
- 8.3.4 LED landscape lighting market size
- 8.3.5 LED urban landscape lighting market potential
- 8.4 Chinese LED backlight market analysis
 - 8.4.1 Mini-LED backlight market analysis
 - 8.4.1.1 Mobile phone user statistics
 - 8.4.1.2 Smartphone production scale analysis
 - 8.4.1.3 Smartphone market analysis
 - 8.4.1.4 Mini-LED backlight market demands
 - 8.4.2 Medium-LED backlight market demands
 - 8.4.2.1 Tablet PC production figures
 - 8.4.2.2 Notebook computer production figures
 - 8.4.2.3 Medium-LED backlight market demands
 - 8.4.3 Large-LED backlight market analysis
 - 8.4.3.1 Color TV production scale
 - 8.4.3.2 Large-Led backlight demands
- 8.5 Chinese LED headlights market analysis
 - 8.5.1 Chinese vehicle production analysis
 - 8.5.2 Advantages to using LEDs as headlights
 - 8.5.3 LED headlight products categorization and requirements
 - 8.5.4 LED headlight applications and design requirements
 - 8.5.5 LED headlight market applications and developments
 - 8.5.6 Chinese LED headlight productions overview

- 8.5.7 Chinese LED headlight development trends analysis
- 8.6 Chinese LED street light market analysis
- 8.6.1 A comparison between LED street lights and traditional street lights
- 8.6.2 Cost analysis of LED street lights
- 8.6.3 LED street light market developments
- 8.6.4 LED street light development technical difficulties
- 8.6.5 LED street light market size
- 8.6.6 LED street light market prospects
- 8.7 Olympics and World Expo applications
- 8.7.1 LED applications at the Olympics
- 8.7.2 LED applications at the Shanghai World Expo

CHAPTER 9 CHINESE LED DEVELOPMENT BASES

- 9.1 Shenzhen LED industry analysis
 - 9.1.1 Shenzhen LED industry developments
 - 9.1.2 Formation of the Shenzhen LED industry cluster
 - 9.1.3 Shenzhen LED supply chain company distribution
 - 9.1.4 Shenzhen LED industry development problems
 - 9.1.5 Shenzhen LED industry development goals
 - 9.1.6 Shenzhen LED industry technological development goals
- 9.1.7 Shenzhen LED industry development methods
- 9.2 Shanghai LED industrialization base overview
 - 9.2.1 Shanghai LED industry development overview
 - 9.2.2 Shanghai LED industrial space distribution
 - 9.2.3 Shanghai LED supply chain developments
 - 9.2.4 Shanghai LED industry technology developments
 - 9.2.5 Shanghai LED industry development policies
- 9.2.6 Shanghai LED industry development prospects
- 9.3 Xiamen LED industrialization base overview
- 9.3.1 Xiamen LED industry developments
- 9.3.2 Xiamen LED industrial space distribution
- 9.3.3 Xiamen LED supply chain development
- 9.3.4 Xiamen LED industry R&D
- 9.3.5 Xiamen LED industry development policies
- 9.3.6 Xiamen LED industry development prospects
- 9.4 Dalian LED industrialization base developments
 - 9.4.1 Dalian LED industry development analysis
 - 9.4.2 Dalian LED industrial space distribution

- 9.4.3 Dalian LED industry chain developments
- 9.4.4 Dalian LED industry R&D
- 9.4.5 Dalian LED industry development policies
- 9.4.6 Dalian LED industry development prospects
- 9.5 Nanchang LED industrialization base developments
- 9.5.1 Nanchang LED industry developments
- 9.5.2 Nanchang LED industry development advantages
- 9.5.3 Nanchang LED industry chain developments
- 9.5.4 Nanchang LED industry development strategies and positioning
- 9.5.5 Nanchang LED industry development goals
- 9.5.6 Nanchang LED industry development key regions
- 9.5.7 Nanchang LED industry development safeguards
- 9.6 Shijiazhuang LED industrialization base developments
 - 9.6.1 Shijiazhuang LED industry development analysis
- 9.6.2 Shijiazhuang LED industry chain development
- 9.6.3 Shijiazhuang LED industry R&D
- 9.6.4 Shijiazhuang LED industry development policies
- 9.7 Yangzhou City LED industry development
 - 9.7.1 Yangzhou LED industry development analysis
 - 9.7.2 Yangzhou LED photoelectric industry development advantages
 - 9.7.3 Yangzhou LED photoelectric company analysis
 - 9.7.4 Yangzhou LED industry development policies
 - 9.7.5 Yangzhou LED lighting industry development strategies

CHAPTER 10 LED LIGHTING INDUSTRY TECHNOLOGICAL ANALYSIS

- 10.1 International LED lighting technology
- 10.1.1 International technological development overview
- 10.1.2 International technological development trends
- 10.2 Domestic technological trends
- 10.2.1 Domestic technological developments analysis
- 10.2.2 Domestic technological developments overview
- 10.3 International LED industry chain patents
 - 10.3.1 EPI wafer technology is the focal point of patented technology
 - 10.3.2 Main technological representatives in the field equipment manufacturing
 - 10.3.3 Packaging technology patent distribution
 - 10.3.4 Process technology coverage
- 10.3.5 Substrate patents are distributed over many different companies
- 10.4 Chinese LED patent developments

- 10.4.1 Chinese LED patent development overview
- 10.4.2 Problems in the Chinese patent methodology
- 10.4.3 LED patent development strategies

CHAPTER 11 CHINESE LED COMPANIES

- 11.1 Fangda Corporation
 - 11.1.1 Development overview
 - 11.1.2 Main products
 - 11.1.3 Operational overview
 - 11.1.4 Sales network
 - 11.1.5 Competitive advantages
- 11.2 Furi Electronics
 - 11.2.1 Development overview
 - 11.2.2 Main products
 - 11.2.3 Operational overview
 - 11.2.4 Sales network
 - 11.2.5 Competitive advantages
 - 11.2.6 Development strategies
- 11.3 THTF
- 11.3.1 Development overview
- 11.3.2 Main products
- 11.3.3 Operational overview
- 11.3.4 Sales network
- 11.3.5 Competitive advantages
- 11.3.6 Development strategies
- 11.4 Shenzhen MTC
- 11.4.1 Development overview
- 11.4.2 Main products
- 11.4.3 Operational overview
- 11.4.4 Sales network
- 11.4.5 Competitive advantages
- 11.4.6 Development strategies
- 11.5 Sanan Electronics
 - 11.5.1 Development overview
 - 11.5.2 Main products
 - 11.5.3 Operational overview
 - 11.5.4 Sales network
 - 11.5.5 Competitive advantages

- 11.5.6 Development strategies
- 11.6 Yankon Corporation
- 11.6.1 Development overview
- 11.6.2 Main products
- 11.6.3 Operational overview
- 11.6.4 Sales network
- 11.6.5 Competitive advantages
- 11.6.6 Development strategies
- 11.7 Elec-Tech International
- 11.7.1 Development overview
- 11.7.2 Main products
- 11.7.3 Operational overview
- 11.7.4 Sales network
- 11.7.5 Competitive advantages
- 11.7.6 Development strategies
- 11.8 MLS
 - 11.8.1 Development overview
 - 11.8.2 Main products
 - 11.8.3 Operational overview
 - 11.8.4 Sales network
 - 11.8.5 Competitive advantages
 - 11.8.6 Development strategies
- 11.9 Lianchuang Electronics
 - 11.9.1 Development overview
 - 11.9.2 Main products
 - 11.9.3 Operational overview
 - 11.9.4 Competitive advantages
 - 11.9.5 Development strategies
- 11.10 Silan Electronics
 - 11.10.1 Development overview
 - 11.10.2 Main products
 - 11.10.3 Operational overview
 - 11.10.4 Sales network
 - 11.10.5 Competitive advantages
 - 11.10.6 Development strategies

CHAPTER 12 CHINESE LED INDUSTRY DEVELOPMENT TRENDS AND PROSPECTS

12.1 Chinese LED industry development trends from 2019 to 2023

- 12.1.1 Further breakthroughs in technologies to ensure higher quality lighting
- 12.1.2 Application specialization will become a new point of growth

12.1.3 Industry resources will be clustered even further, with cross-category mergers expected to become the norm

- 12.1.4 Slower market growth will call for stronger risk management
- 12.2 Chinese LED industry development prospects from 2019 to 2023
- 12.2.1 LED lighting industry development goals
- 12.2.2 LED industry technological innovations
- 12.2.3 LED industry high efficiency lighting product propogation goals
- 12.2.4 LED industry and the Belt and the Road initiative
- 12.3 Chinese LED industry prospects analysis from 2019 to 2023
 - 12.3.1 Chip market prospects analysis
 - 12.3.2 Packaging market prospects analysis
- 12.3.3 Application market prospects analysis
- 12.4 Merger and Acquisition opportunities
- 12.5 Chinese LED lighting industry development factors
- 12.5.1 Detrimental factors
 - 12.5.1.1 High degree of competition
 - 12.5.1.2 Lack of skilled personnel
 - 12.5.1.3 Low degree of industry concentration
 - 12.5.1.4 Lack of industry standards and testing standards
- 12.5.2 Positive factors
- 12.5.2.1 Greater awareness of energy conservation
- 12.5.2.2 Policy support
- 12.5.2.3 Lower costs
- 12.5.2.4 Greater range of applications
- 12.5.2.5 Frequent technological advancements
- 12.5.3 Industry barriers
 - 12.5.3.1 Funding barriers
 - 12.5.3.2 Technological barriers
 - 12.5.3.3 Brand barriers
 - 12.5.3.4 Human resource and experience barriers
- 12.6 Market attractiveness analysis
- 12.7 LED industry investment risks from 2019 to 2023
 - 12.7.1 Market competition
 - 12.7.2 Technological risks
 - 12.7.3 Policy risks
 - 12.7.4 Macroeconomic risks

I would like to order

Product name: Report on the Chinese LED Market 2019-2023

Product link: https://marketpublishers.com/r/R3C0D935AA7EN.html

Price: US\$ 5,000.00 (Single User License / Electronic Delivery) If you want to order Corporate License or Hard Copy, please, contact our Customer Service: <u>info@marketpublishers.com</u>

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <u>https://marketpublishers.com/r/R3C0D935AA7EN.html</u>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name: Last name: Email: Company: Address: City: Zip code: Country: Tel: Fax: Your message:

**All fields are required

Custumer signature _____

Please, note that by ordering from marketpublishers.com you are agreeing to our Terms & Conditions at <u>https://marketpublishers.com/docs/terms.html</u>

To place an order via fax simply print this form, fill in the information below and fax the completed form to +44 20 7900 3970
