Abstracts

In recent years, xylo-oligosaccharide becomes increasingly popular around the world, with commercial value of over USD4 billion and USD1 billion in functional food and functional feed supplement respectively.

Xylo-oligosaccharide has been widely applied to commercial use, especially in industries such as health food, animal food, functional food and beverage, dairy products, as well as pharmaceutical industry. The estimated demand from these industries adds up to around 19,260 tonnes in 2015, which demonstrates great potentials of the industry and business opportunities.

In this report, ASKCI analyzes the current situation and development of xylo-oligosaccharide industry to provide understanding of this industry in terms of production, import and export, key players, market potential, etc. Meanwhile, forecast and recommendations will be given at the end of the report to describe the prospect and provide forward-thinking strategies.
