Abstracts

It takes 3-5 business days to dispatch the report after the purchase is made.

1. INTRODUCTION

Since new energy vehicle industry was listed on the national new emerging strategic industry, electric vehicle becomes a rising point of China automobile industry. From Feb. to Oct. of 2016, output and sales of plug-in hybrid electric vehicles were both nearly 80 thousand, rising by around 31% and 37%. Pure electric vehicles lead in the industry, with output and sales of nearly 280 thousand and 260 thousand, rising by about 98% and 103%. It is predicted that in 2020, the sales of the two vehicles will reach respectively 1.1 million and 3.9 million.

For the past ten years, financing and investment present plain in electric vehicle industry. Though led by major companies, such as Tesla, the investment shows a rising trend. Up to 17th Nov 2016, there were 46 financing cases with the amount of nearly RMB1.7 billion. In the light of the unchanged number of investment in electric vehicle industry for three years, it is indicated that the investment has significantly intensified. From the perspective of motor traffic, venture at seed stage of angel investment and investment at A round take 77%, showing that venture capital is still in its starting phase.

Although electric vehicle industry in China is too relied on supporting policies and related factors set barriers before the industry's development, it is inevitable that vehicles will be completely powered by electric and become intelligent. Moreover, vehicles will be combined with the internet, urban traffic and passenger transport. To summon up, electric vehicle industry possesses a considerable future and there is large

room for venture capital.
