Executive Summary

Global Dental Imaging Equipment Market was valued at USD 2445.6 million in the year 2019. Ever increasing geriatric population and growing number of cases related to dental problems coupled with enhanced prevalence of various dental diseases including edentulism, tooth loss, periodontal diseases, among others and leading global manufacturers focusing on driving the technological advancement in their products and services has been estimated to drive a remarkable growth in the market.

Under the product segment, ExtraOral X-Rays is anticipated to witness the largest market share owing to growing availability of improved technology and innovative dental imaging equipment which are constantly depicting notably strong sales as clinicians continue to modernize their dental practices with manufacturers offering different types of dental imaging equipment. These factors will be infusing growth in the market for Dental Imaging Equipment during the forecast period.

Hospitals followed by Ambulatory Surgical Centers, and Dental Laboratories respectively attained substantial market share as End User segment, chiefly on the back of growing presence of hospitals and clinics with availability of various dental services and better treatment offered by clinicians backed with growing collaborations between leading manufacturers with clinics, surgeons, hospitals and healthcare institutes to better understand the need of patients and offer them the right products and services.

Among the regions, North America followed by Europe and Asia Pacific, will account for remarkable market share owing to presence of leading dental manufacturers in the region which are constantly engaged in innovating their products offering and investing in incorporation of advanced technology supported by burgeoning demand for Cone Based Computed Tomography (CBCT). Also, governments in various regions taking initiatives and organizing various events to create awareness among consumers regarding maintenance of good oral health, will be propelling the Dental Imaging Equipment market growth during the period of 2020-2025.
