### **EXECUTIVE SUMMARY**

The Graphite market was valued at USD 17613.93 Million in the year 2018. Over the recent years, Graphite market has been witnessing considerable growth on the back of rapid demand of graphite for various applications including lithium ion and hybrid and electric vehicles and also increasing demand for high-purity graphite in fuel-cell and battery applications. In addition, rising demand of graphite for lightweight materials in aircraft components, opening of new graphite mines have contributed to the growth rate of Graphite market. These factors are anticipated to provide higher momentum to the market growth in the forecast period.

Among all the types of Graphite that includes natural graphite and synthetic graphite. synthetic graphite holds the highest market share in the Graphite Market owing to the superior consistency and high purity of synthetic graphite compared to the natural graphite, increasing demand from the electronic industries, high demand of graphite for the graphite electrode manufacturing, carbon fibres and also growing demand from the nuclear industry.

Among the regions, Asia Pacific Market will continue to be the largest market in the forecast period, majorly driven by escalating number of manufacturing of electric and hybrid vehicles, growing infrastructure and construction in developing countries, rise in the demand of batteries for various application, rise in the production of the mobile phones, laptops and other electronic devices.
