Global High Performance Pigments Market is forecasted to grow at a CAGR of 4.21% during 2016 – 2021. The high growth rate in high performance pigments industry is fuelled by the mounting demand from construction and automotive sectors for advance coatings. Apart from that, the uncovering of the wide range of applications in fast-growth industries including plastics and textiles, inks and cosmetics has been impelling growth in market, in the forecasted period.

Although, inorganic high performance pigments hold the larger percentage share in the total market, demand for organic HPPs is projected to advance at a faster rate in the future owing to the increasing environmental regulations and high applicability. Among the regions, APAC is predicted to advance at the highest rate, mainly driven by the changing industrial dynamics, pouring number of vehicle production, growing plastics and textile consumption and shift of manufacturing facilities in low-cost countries in the region.

According to Azoth Analytics research report, Global High Performance Pigments Market: Analysis By Type (Inorganic and Organic), By Application (Coatings, Plastics & Textiles, Inks, Cosmetics and Others), By Region, By Country (2016-2021), global market is projected to exhibit a CAGR of 4.21% during 2016 - 2021.
