Executive Summary

The Global MDI, TDI and Polyurethane Market was valued at USD 67.3 Billion in the year 2020. The global MDI, TDI and Polyurethane market is witnessing lucrative growth owing to the largest application in the building and construction industry, where it is used in various household, commercial, and industrial applications and also owing to its excellent strength-to-weight ratio, insulation properties, durability, and versatility.

The major factors driving the market for MDI, TDI and Polyurethane include an increase in new households, rising average construction spending, rising government spending on sustainable building development, rapid urbanisation, and growth in disposable income across several economies.

Asia-Pacific continues to be the dominant region for growing market demand due to skilled labor, easy raw material accessibility, and local government support. Further, strong growth from various end-use sectors, including construction, automotive, mining, footwear, and so on, which is further fuelling the demand for polyurethanes.

The global pandemic has affected almost every sector in the world. The MDI, TDI and polyurethane market is expected to be negatively affected due to disruptions in the global supply chain. The market is highly dependent on the building & construction, automotive and consumer goods industries. The demand for construction equipment

declined significantly in the first quarter of 2020, mainly due to the outbreak of COVID-19.
