EXECUTIVE SUMMARY

The Global Mortar Market was valued at USD 22274.70 Million in the year 2020. Asia Pacific region holds the major Mortar market share with countries such as China, Japan and India being the major contributors to the regional market. Increase in the use of mortar in the region, especially in China, is the major growth-driving factor.

Dry Mortar segment is expected to hold slightly larger share of Mortar market. The factors can be attributed to their benefits such as easy portability of the materials, easy to use, mobility and flexibility to use it anywhere in construction. The future of the dry mix mortar market looks promising with opportunities in the residential and non-residential industries. The global dry mix mortar market is expected to grow with some regions such as America, well mixed mortar is preferred because it is a mortar that contains a set-control admixture and is mixed at a central location which is propelling the market.

The Construction segment is anticipated to account for the highest share in the forecasted period. The factors can be attributed to the introduction of new technologies and energy efficient ways in the industry for the betterment of the society and the sustainable future.

The global mortar market looks more promising with opportunities in non-residential and residential construction sectors. Some of the driving factors are burgeoning construction

activities, growing repair and maintenance of building exteriors, and a rise in the hospitality industry. The development of mega infrastructure projects around the world, especially in emerging economies, is acting as another major growth-inducing factor.
