Over the recent years, global PEEK market has been witnessing growth, on account of several driving factors including rising demand for automotive, surging investment in aerospace & defence industry, rising demand of aircrafts, electronic products and medical devices, growing government initiatives for reducing carbon-dioxide level. Industrial applications of PEEK include its use in pumps and compressors, sealing rings, and transport systems. This material is used to replace metal in applications that require substantial quantities of metal, such as offshore and aviation. Furthermore, rising demand for electric cars & light weight automotive has been driving the revenue of PEEK companies. Besides, the growing global consumer awareness regarding environment-protection and the resultant demand for fuel-efficient, lightweight vehicles have forced the manufacturers in the automotive sector to reduce the overall weight of the vehicles.

In this research report, the market is segmented on the basis of application type and product type, by end use product, the segment of Glass Fibre is predicted to hold its dominant position in the market. Amongst the regions, Europe accounts for the largest regional share in the global PEEK market in 2018. Moreover, APAC region is also predicted to maintain its dominant position in the market in forecast period. Presence of vast consumer base, particularly in emerging nations such as China and India is likely to drive the regional market.
