### **EXECUTIVE SUMMARY**

As stated by the research report published by Azoth Analytics in August 2019, the Global Regenerative Medicine Market was valued at USD 22,814.45 million the year 2018. Driven by a number of differentiated fundamental factors including rise in the prevalence of chronic diseases and increase in medical research investments, the global market for regenerative medicine has been advancing at an augmented pace. The growth has been primarily driven by the search to find permanent cure of large number of incurable diseases such as various autoimmune and metabolic ailments, cancer, neurodegenerative disorders among others.

Over the recent years, regenerative medicine market has been witnessing considerable growth on the back of rising incidence of chronic diseases, rapidly growing medical research facilities, increasing investment by pharmaceutical manufacturers, and growing government initiatives. In addition, expanding product pipeline of companies and growing number of partnerships and collaborative agreements in this industry is anticipated to fuel the market growth in forecast period. However, high cost associated with the manufacturers and use of regenerative therapy has been hindering market growth.
