Executive Summary

The Global Rheumatoid Arthritis Market was valued at USD 24.46 Billion in the year 2020. Globally, the market for rheumatoid arthritis is increasing rapidly and the major factor that drives the growth of rheumatoid arthritis is the increasing ageing population. Furthermore, some evidence suggests that people who smoke are at an increased risk of developing rheumatoid arthritis.

DMARDs segment is expected to hold a significant share in the Rheumatoid Arthritis Market on the back of the increasing prevalence of rheumatoid arthritis incidences across the globe, the launch of the therapeutic agents, and the favourable reimbursement policies for the high-cost treatment products. These are the major factors propelling the growth of the market.

Americas region dominated the global Rheumatoid Arthritis market and led the industry in 2020 owing to the presence of a large patient base and availability of well-developed infrastructure, rising awareness regarding disease treatment, growing geriatric population, and high adoption of biopharmaceuticals for treatment.

There is also an increase in funds provided to academic research institutions and individual researchers that is expected to boost the market growth. Moreover, various initiatives by international bodies, such as WHO and NIH for the prevention and

treatment of chronic disorders, such as cardiovascular diseases, Rheumatoid Arthritis and cancer are anticipated to facilitate the growth of the market.
