Executive Summary

Increasing concern towards declining crude oil prices coupled with the restoration of mature fields and exploring deep sea oil and gas reservoirs drive the growth of Umbilical Market.

The Global Umbilical Market in Oil and Gas Industry has been growing at a positive rate, on account of the rising demand for oil and gas globally. The decline in the exploration and production, due to surplus oil in market across the globe has delayed the projects for the time being. However, increasing deep sea developments for hydrocarbons have been triggering the offshore market further driving the market for Umbilical.

During 2016-21, Global Umbilical market in oilfield is anticipated to grow at a CAGR of 3.66%. Moreover, a decrease in crude oil prices will induce more pressure on the economies to exercise cost effective well practises and will result in rise in umbilicals in the coming years.
