EXECUTIVE SUMMARY

A comprehensive research report created through extensive primary research (inputs from industry experts, companies, stakeholders) and secondary research, the report aims to present the analysis of global Vascular Access Devices market. The report analyzes the Vascular Access Devices market, By Product Type (Peripherally Inserted Central Catheters, Central Venous Catheters, Implantable Ports and others) and By Mode of Insertion (Intravenous and Subcutaneous). The Vascular Access Devices market has been analyzed By Region (North America, Europe, Asia Pacific and Rest of the World) and By Country (U.S, Canada, United Kingdom, Germany, China, Japan, India, Brazil and Mexico) for the historical period of 2014-2018 and the forecast period of 2019-2024.

According to the Azoth Analytics research report, Global Vascular Access Devices Market reached a value of USD 6.7 billion in the year 2018.

Over the past few years, an array of economic, demographic, technological as well as

environmental factors have been igniting a revolution in the healthcare industry. Increasing investments in research and development projects associated with vascular access devices by key players including Becton, Dickinson and Company, AngioDynamics, Teleflex, Inc., Fresenius Medical Care, B.Braun Melsungen, etc., has been pushing the market in the right direction. Besides these factors, increasing incidence of chronic diseases and surge in medical tourism have also been supporting the upward trend of the market. On the basis of mode of insertion, the global market has been dominated by intravenous vascular access devices and this trend is anticipated to continue in the forecast period as well. Furthermore, various advantages associated with subcutaneous vascular access devices such as implantable ports include independent/at-home-care, low discernibility, avoidance of puncture wounds and damage directly to the vein, etc. These benefits allow the patients to have more flexibility in their day-to-day lives, which is the principal reason behind their demand growth in the market.

Amongst the regions, North America accounted for the largest regional share in the global vascular access device market in 2018. However, in the forecast period, the Asia Pacific region is anticipated to advance at the highest pace. Some of the key factors driving the robust growth rate of Asia Pacific region include presence of vast consumer base, significant improvements in medical infrastructure in addition to rapid economic development in countries such as China and India.
