Abstracts

The report analyses Retail Industry in Canada. It covers general statistics, including industry volumes by sales and income, and industry dynamics within the recent period. The description of industry structure by company is included as well, establishing extent of market concentration and evaluating companies' market shares. Analysis includes detailed information about the internal and external factors that affect Retail Industry in Canada.

The report provides detailed Retail Industry comparative analysis with interrelated data on major companies. The areas under consideration are as follows: - company strategic position in the industry - profitability and margin analysis - assets turnover and credit ratios reviews - long-term solvency indicators - growth trends comparison

The report also presents company rankings by size, value, profit margin and growth history, thus giving a full picture of each company mentioned.

The report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases. Annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of the industry.

5. INDUSTRY EXPERTS FORECAST AND OPINIONS

APPENDIX: RATIO DEFINITIONS

The above Industry Comparative Analysis is a half-ready report.

It only requires updating with the help of new data that are constantly retrieved from Publisher's databases and other sources. This updating process takes 3-5 business days after order is placed. Thus, our clients always obtain a revised and updated version of each report. Please also note that we do not charge for such an updating procedure. BAC Reports has information for more than 40,000 different companies available but it is impossible to have all reports updated immediately. That is why it takes 3-5 days to update a report after an order is received.
