Abstracts

The Russian market for base oils is traditionally characterized by large oversupply. To this extent, the period of 2005-2010 was not an exception. In the coming 20 years the Russian market for base oils will continue to be largely oversupplied and shaped by the sector of end-products.

The consumption of base oils will be driven by the consumption of lube oils. Only a small fraction of base oils is consumed in the form of unprocessed industrial oils. The demand for base oils in Russia is expected to grow since the need in lubricants will augment in hydraulic, turbine, automotive and other machinery applications.

This report provides a detailed analysis of the Russian base oil market in 2004-2010 and gives a forecast of its behavior up to 2030. The report contains an overview of the Russian oil-refining industry, including historical, current and forecasted data.

The analysis of the Russian base oil market comprises the following elements:

supply and demand

market balance

prices

logistics

market forecast

Please note that the report is a half-ready publication which means we have all information for the report production but it needs to

be organized into a finalized product. Besides, it requires updating with the help of new data that are constantly retrieved from various sources. This process takes 8-10 business days after the order is placed. Thus, our clients always obtain a revised and updated version of each report. BAC Reports has information for more than 25,000 different products available but it is impossible to have all reports finalized and updated immediately. That is why it takes 8-10 days to update a report after an order is received.
