Abstracts

Dihydroquercetin is an important bioflavonoid with effective antioxidant properties. The main source of dihydroquercetin is the root and butt parts of the Siberian and Daurian larch. Russia has the world's largest reserves of raw materials for the production of dihydroquercetin.

In Russia, dihydroquercetin is produced in industrial volumes with a purity of 70 to 99.5%. Ametis is the largest manufacturer of dihydroquercetin in Russia and globally.

Dihydroquercetin demand is estimated at several dozens of tons. The Russian market is expected to continue growing. High growth rates are forecasted - 6-7% per year.

In addition to Russia, dihydroquercetin is produced in the USA, Canada, Japan, and Germany. In recent years, the global market for dihydroquercetin has shown an annual growth of 4-5%.

Taking into account the existing and possible areas of application of dihydroquercetin, world dihydroquercetin demand can reach much larger volumes than it is now.

However, no matter what dihydroquercetin market volumes are foreseen, the demand will depend on the supply, which is currently limited. The main suppliers of dihydroquercetin will be countries that have access to raw materials.

The report performs overview of dihydroquercetin (taxifolin) market in CIS countries and globally. It describes present situation, covers dihydroquercetin manufacturers, provides with data on production and consumption. Dihydroquercetin market forecast is also included in the report.
