Abstracts

The report presents detailed overview of the Fireproofing Compounds market in the world and regions (CIS countries in particular) by contemplating and analyzing its various parameters.

Firstly, brief introduction is provided. Thus, fireproofing compounds properties, application areas and manufacturing technologies are considered. Further goes the analysis of global fireproofing compounds market with emphasis on its main components which are production, consumption, prices, global trade, future forecast, etc. This part focuses on regional markets as well.

Another important unit of the report is devoted to the CIS market. This part starts from general introduction of the market situation in the region, then follows the thorough research of each country market in particular.

The report also supplies with the data on investment projects, patent information and some other parameters specific for this or that market.

Besides, the current situation in the market the research features market historical background and provides future forecast as well. Thus, this Fireproofing Compounds market research presents full picture of the named market.

Contents

1. FIREPROOFING COMPOUNDS: GENERAL INFORMATION

- 1.1. Definition of fireproofing (antipyretic) compounds
- 1.2. Basic data on the decrease in polymeric material combustibility
- 1.3. Classification of substances retarding polymeric material combustion
- 1.4. Antipyretic compounds, synergists, fireproofing compounds stabilizers
- 1.5. Antipyretic modifying agents
 - 1.5.1. Antipyretic modifying agents used in polymeric materials
- 1.6. General description of gallogen-containing fireproofing compounds
- 1.7. General description of fireproofing compounds containing the group V elements of the periodic system
- 1.8. General description of fireproofing compounds containing boron, aluminum, silicon, other metals and active groups

2. SYNERGISM OF FIREPROOFING COMPOUNDS

- 2.1. Antipyretic antimony- and gallogen-containing compounds
- 2.2. Metal- and gallogen-containing mixtures
- 2.3. Synergism of phosphorus- and gallogen-containing fireproofing compounds
- 2.4. Synergism of phosphorus- and nitrogen-containing fireproofing compounds
- 2.5. Application of fire retardentss together with radical process initiators, sulfur-containing agents, ferrocene, fillers

3. FORMULA COMPOSITION FOR FIREPROOFING COMPOUNDS

4. FIREPROOFING COMPOUNDS: TRENDS AND NEW WAYS OF DEVELOPMENT

- 4.1. Bromine-containing fireproofing compounds
 - 4.1.1. World production of bromine and its derivatives
- 4.2. Melamine derivatives
- 4.3. Metal hydroxides
- 4.4. Blowing agents
- 4.5. Antimony trioxide substitutes
- 4.6. Mixtures and synergists
- 4.7. Cost reduction
- 4.8. Fireproofing polypropylene cost and properties

4.9. Nanocomposite materials: a new class of fireproofing compounds

5. ANALYSIS OF THE WORLD MARKET FOR FIRE RETARDENTSS

5.1. Technological trends

5.2. Commercial trends

5.3. Bromine-containing fireproofing compounds

5.4. Fire retardant demand forecast

6. CIS MANUFACTURERS OF FIRE RETARDENTSS

6.1. Market for fireproofing compounds in the CIS countries

6.2. Manufacturers of fireproofing compounds

7. PRICES

7.1. Market prices

7.2. Contract prices

7.3. Prices for bromine-containing fireproofing compounds

8. R&D

8.1. New developments in the field of fireproofing compounds

8.2. Examples illustrating the application of fireproofing compounds in polymers

8.3 Patent information

8.4. Investment projects

9. FIRE RETARDANT MARKET PLAYERS

9.1. Main suppliers on the fire retardant market

9.2. Representatives of foreign producers of fireproofing compounds

9.3. Offer on the fire retardant market

9.4. Prospective consumers of fireproofing compounds in Ukraine

9.5. Prospective consumers of fireproofing compounds in Russia

Appendices

Please note that the report is a half-ready publication which means we have all information for the report production but it needs to be organized into a finalized product. Besides, it requires updating with the help of new data that are constantly retrieved from various sources. This process takes 8-10 business days after the order is placed. Thus, our clients always obtain a revised and

updated version of each report. BAC Reports has information for more than 25,000 different products available but it is impossible to have all reports finalized and updated immediately. That is why it takes 8-10 days to update a report after an order is received.
