Abstracts

Nanocellulose is a product with good potentials. It is bio-based, renewable, easy to degrade in natural environment. The most of nanocellulose is obtained from wood pulp. It can find applications in many industrial spheres.

Taking into consideration constantly growing environment concerns the demand for bio-based eco-friendly products is to witness growth. Nanocellulose is definitely can be looked upon as one of those.

Until quite a recent time there has been no commercial scale nanocellulose production in the world market. The situation changed with the start of CelluForce plant in the beginning of 2012 and now there are producing units, a number of pilot plants and a range of laboratories that work on nanocellulose synthesis.

Forecasting the global nanocellulose market is quite challenging but the outlook is rather optimistic.

Contents

1. WHAT IS NANOCELLULOSE

- 1.1. Cellulose nanocrystals (CNC)
- 1.2. Cellulose nanofibrils (CNF)

2. KEY PROPERTIES AND CHARACTERISTICS, ADVANTAGES OF NANOCELLULOSE

3. NANOCELLULOSE APPLICATIONS

4. MANUFACTURING PROCESSES

- 4.1. Patents, inventions

5. FEEDSTOCK

- 5.1. The materials nanocellulose can be sourced from
- 5.2. The state and prospects of global pulp & paper industry

6. NANOCELLULOSE SUPPLY WORLDWIDE

- 6.1. Capacity (commercial, pilot, laboratory)
- 6.2. Manufacturers profiles
- 6.3. Production forecast, projects

7. NANOCELLULOSE DEMAND WORLDWIDE

- 7.1. Demand trends, structure
- 7.2. Demand forecast
- 7.3. Potential markets

8. NANOCELLULOSE AND ENVIRONMENTAL ISSUES

Please note that the report is a half-ready publication which means we have all information for the report production but it needs to be organized into a finalized product. Besides, it requires updating with the help of new data that are constantly retrieved from various sources. This process takes 8-10 business days after the order is placed. Thus, our clients always obtain a revised and updated version of each report. BAC Reports has information for more than 25,000 different products available but it is impossible to have all reports finalized and updated immediately. That is why it takes 8-10 days to update a report after an order is received.

I would like to order

Product name: Nanocellulose Global Market Outlook (2018-2030)

Product link: <https://marketpublishers.com/r/G6D1C3D29A5EN.html>

Price: US\$ 2,100.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
