Abstracts

In recent years pentaerythritol production capacities have been transferred from the EU countries and North America to the Asia-Pacific region. Thus, the Asia-Pacific region turned out to be a leader in pentaerythritol manufacturing. For example, China accounts for about 55% of world pentaerythritol capacity.

Alkyd paint production industry, which is the largest pentaerythritol application segment, accounts for 40% of pentaerythritol consumption.

Pentaerythritol consumption in the CIS countries (except Russia) is fully based on imported products. Currently, pentaerythritol consumption in the CIS countries (except Russia) is met mainly by imports from Russia, China, Sweden, Slovakia, Germany and Romania.

The world pentaerythritol market is expected to grow at a CAGR of 4.9% from 2016 to 2020. The market will be driven by the production of plasticizers and alkyd paints.
