Poly (methyl methacrylate) (PMMA), which was brought to market in 1933, is currently utilized as a glass substitute. The material is widely used in such applications as construction, transportation, electronics, furniture and medical products.

Asia Pacific, which accounted for about 65% of the global PMMA demand in 2013, is the largest consumer and manufacturer of the material. The other leading PMMA consumers include also Europe and North America.

Within CIS PMMA is produced only by Russia, while other countries meet demand by imports.

The material consumption is predicted to further escalate in APAC, mainly due to the electronics sector growth in South Korea, China and Taiwan.

The global PMMA market is anticipated to achieve 2.85 million tonnes by 2020.

The report describes the situation on PMMA market in CIS countries and globally. Besides, it includes an overview of the PMMA feedstock market. It also gives information about the main material applications. PMMA market forecast is also provided.
