Abstracts

Polyvinylbutyral (PVB) consumption volumes depend upon the state of the global economy. The automotive and construction industries are particularly important for PVB consumption. The main PVB manufacturers are as follows: Eastman, Sekisui, DuPont and Kuraray. However, new companies, especially from countries with the booming automobile sector, will enter the PVB market in the nearest future.

Western Europe, United States, China, and Japan are major global consumers of polyvinyl butyral. PVB consumption growth in developed countries (the US, Japan, the European Union and some ME countries) is driven by the rising demand for PVB laminated glass, which is popular in construction and automotive applications.

The same trend is vivid in the CIS countries, where PVB is widely used in the car industry and construction. Local production is insufficient to meet current needs, so large PVB volumes are imported into the region. Russia was the only producer of polyvinyl butyral in CIS Countries till 2011, but nowadays there are no reliable production sites in the country. Other CIS Countries don't possess production capacities and import total volume of domestic consumption.

The report provides analysis of polyvinyl butyral (PVB) market in CIS Countries and globally. Major topics considered for world market are: polyvinyl butyral production, consumption, prices in recent years. Barite feedstock is included. Market forecast is given. Besides global market review the report provides description of trends and peculiarities of polyvinyl butyral market in CIS countries.
