company's decision-making processes.

In the part that describes 3i Group plc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of 3i Group plc business.

About 3i Group plc

3i Group Plc is a private equity and venture capital firm specializing in private equity, buyouts, venture capital, and growth capital investments. It prefers to invest in business services, healthcare, consumer, media, oil, gas, power, technology, general industries, financial services, infrastructure, and regional sectors. The firm also seeks to invest in family owned business. It seeks to invest in media businesses at all stages of development and on selective basis, it also makes early-stage venture investments in oilfield technologies. The firm typically makes growth capital investments in medium-sized businesses in the healthcare, financial services, food and drink, media, IT services, support services, and oil and gas sectors. It prefers to invest in buyouts across a broad range of sectors with a particular focus on healthcare, business services, telecommunication, media, consumer, and oil, gas and power. The firm typically invests in business services with a focus on blue collar services (including cleaning, security, repair and maintenance, and facilities management); white collar services (including consultancy services including engineering, environmental, and recruitment and training and process outsourcing); distribution; and rental services (including hire of equipment and other non consumables). In the healthcare sector it focuses on pharmaceuticals and biotechnology (including supply drug marketing and delivery services, as well as animal health specialists), medical devices and technology (including dialysis and cardiovascular equipment, through to surgical instruments and imaging technology), and specialist care service providers (including care activities for the young, the

disabled, and the elderly in their own homes, in hospitals, and in community facilities, and vitally-important diagnostic services). In the consumer sector the firm focuses on consumer goods, retail, food and drinks, and leisure (travel distribution, hotels and resorts, local leisure, betting and gaming, and hospitality). In the media sector it prefers to invest in broadcasting and entertainment (including TV, radio, Internet, and mobile broadcasting, the creators and owners of content, and suppliers of allied services), publishing and information (ranging from newspapers, through to directories and business information), marketing services (marketing and advertising including market research), and technology (software and hardware that enables major disruptions within large markets). In the oil, gas, and power sectors the firm focuses on exploration and production, oil services (including services which provide products, people, and technology for all elements of drilling, evaluation, development, construction, and production), and midstream gas and power which includes companies that develop, generate, store, and transmit energy. Within the gas and power sector it seeks to invest in companies delivering oil and gas to the consumer, through activities such as gas storage, transportation in liquefied form, refining, and distribution; generating power and transmitting and distributing; developing alternatives to oil and gas, including biofuels; products/components like generators and services such as wind turbine maintenance for related activities. In the technology sector the firm focuses on software and Internet (including digital marketing, e-commerce, social media), online media, telecoms, electronics and semiconductors, IT services, and cleantech (including energy, air and water, waste management, and supporting technologies like sensing and remote monitoring technologies, process innovations, and new materials). In the general industrial sectors it prefers to invest in aerospace and defense; automotive; chemicals; construction and building materials; electronic and electrical equipment; industrial engineering; paper, packaging, and print; and transport and logistics. In the financial sectors it seeks to invest in asset management, specialty finance, general insurance, outsourcing providers, and electronic trading. In the software sector the firm does not invest in generic office and enterprise applications. It prefers to invest

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
