Its gross profit rose by 1.34% to USD 11,842.0 million against FY 2015 with USD 11,685.0 million. Company's operating income also increase by 6.87% in FY 2016, but Abbott's gross profit declined significantly by 68.35% to USD 1,400.0 million.

As of FY 2016, Abbott Laboratories saw its revenue rising up 2.20% to USD 20,853.0 million compared to the previous year. Its gross profit rose by 1.34% to USD 11,842.0 million against FY 2015 with USD 11,685.0 million. Company's operating income also increase by 6.87% in FY 2016, but Abbott's gross profit declined significantly by 68.35% to USD 1,400.0 million.

Abbott Laboratories engages in the discovery, development, manufacture, and sale of health care products worldwide. The company's segments include Pharmaceutical Products, Diagnostic Products, Nutritional Products, and Vascular Products

Pharmaceutical Products

This segment offers a line of adult and pediatric pharmaceuticals manufactured, marketed, and sold worldwide and are generally sold directly to wholesalers, distributors, government agencies, health care facilities, specialty pharmacies, and independent retailers from Abbott-owned distribution centers and public warehouses. Outside the United States, sales are made either directly to customers or through distributors, depending on the market served. Certain products are co-marketed or co-promoted with other companies.

The principal products included in the Pharmaceutical Products segment are Humira, for the treatment of rheumatoid arthritis, psoriatic arthritis, ankylosing spondylitis, psoriasis, and Crohn's disease; TriCor, Trilipix, Simcor, and Niaspan, for the treatment of dyslipidemia; Kaletra, Aluvia, and Norvir, protease inhibitors for the treatment of HIV infection; Synthroid, for the treatment of hypothyroidism; Lupron, also marketed as Lucrin, and Lupron Depot, used for the palliative treatment of advanced prostate cancer, treatment of endometriosis and central precocious puberty, and for the preoperative treatment of patients with anemia caused by uterine fibroids; Depakote, an agent for the treatment of epilepsy and bipolar disorder and the prevention of migraines; the anesthesia products sevoflurane (sold in the United States under the trademark Ultane and outside of the United States primarily under the trademark Sevorane and in a few other markets as Ultane), isoflurane, and enflurane; the anti-infective clarithromycin (sold under the trademarks Biaxin, Klacid, and Klaricid), and various forms of the antibiotic erythromycin, sold primarily as PCE or polymercoated erythromycin, Erythrocin, and E.E.S.; Zemplar, for the prevention and treatment of secondary hyperparathyroidism associated with chronic kidney disease and Stage 5 treatment; and Ogestro (lansoprazole), a proton pump inhibitor that is marketed outside of the United States and used principally for the short-term treatment of gastroesophageal reflux disease, duodenal ulcers, gastric ulcers, and erosive esophagitis.

Diagnostic Products

This segment offers a line of diagnostic systems and tests manufactured, marketed, and sold worldwide to blood banks, hospitals, commercial laboratories, clinics, physicians' offices, alternate-care testing sites, and plasma protein therapeutic companies. The segment's products are generally marketed and sold directly from Abbott-owned distribution centers and public warehouses and third-party distributors. Outside the United States, sales are made either directly to customers or through distributors. The company owns Ibis Biosciences, Inc.

The principal products included in the Diagnostic Products segment are immunoassay systems, including ARCHITECT, AxSYM, IMx, Commander, Abbott PRISM, TDx, and TDxFix; chemistry systems, such as ARCHITECT c4000, c8000, and c16000; assays used for screening and/or diagnosis for drugs of abuse, cancer, therapeutic drug monitoring, fertility, physiological diseases, and infectious diseases such as hepatitis and HIV; the m2000, an instrument that automates the extraction, purification, and preparation of DNA and RNA from patient samples and detects and measures infectious agents, including HIV, HBV, HCV, HPV, and CT/NG; the Vysis product line of genomic-based tests, including the PathVysion HER-2 DNA probe kit and the UroVysion bladder cancer recurrence kit; a full line of hematology systems and reagents known as the Cell-Dyn series; and the i-STAT point-of-care diagnostic systems and tests for blood analysis.

In addition, under a distribution agreement with Celera Group, the Diagnostic Products segment distributes certain Celera molecular diagnostic products, including the Viroseq HIV genotyping system and products used for the detection of mutations in the CFTR gene, which causes cystic fibrosis.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
