The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Abengoa SA business.

About Abengoa SA

Abengoa, S.A. operates as an industrial and technological company in Seville. The principal activities of the company include provision of integral solutions to the sectors, such as energy, telecommunications, transport, water, environment, industry, and services. It operates through four business groups, which include bio energy, environmental services, information technologies (IT), and engineering and industrial construction.

Bio energy

Bio energy group involves in the production of ethyl alcohol from vegetable products (cereals, biomass). The resulting alcohol (bioethanol) is used to manufacture ETBE (a petrol additive) or is blended directly with petrol and gas oil. It also produces Distillers Dried Grains with Solubles, a protein complement for animals and carbon dioxide.

Environmental Services

Environmental services group engages in aluminum waste recycling, salt slag recycling, zinc waste recycling, industrial waste management, hydrocarbon cleaning, and environmental engineering services. It engages in the engineering and construction for water treatment and waste management. Its environmental engineering activities are

carried out by the companies Befesa Construction y Tecnologia Ambiental and Befesa Fluidos. Befesa Construction focuses on the design, construction and operation of hydraulic infrastructure related to the integral water cycle and the treatment and management of solid urban wastes.

Information Technologies

The company provides IT solutions for specific industrial sectors, such as energy, environment, traffic and transport. Telvent executes projects and supplies technical services in the field of real time control and information management, which are complemented with the portfolio of outsourcing and consulting services, for managing IT and technological infrastructure for its international client base. Telvent operates in Spain, North America, Latin America and Asia.

Industrial Engineering and Construction

The company engages in engineering, construction and maintenance of electrical, mechanical and instrumentation infrastructures for the energy, industrial, transport and services sectors. It develops, constructs and operates industrial plants, conventional power plants (cogeneration and combined cycle) and renewable energy facilities (bioethanol, biomass, wind, solar, geothermal), as well as those based on hydrogen and fuel cells. It provides telecommunications networks and projects. The company merchandises products related to aforementioned activities, as well as manufacturing auxiliary elements for energy and telecommunications.

Market

The company operates predominantly in Argentina, Brazil, Chile, China, Morocco, Mexico, Peru, Portugal, Puerto, Rico, the United Kingdom, Latin America, Asia and Uruguay.

Significant Events

On September 1, 2009, Pemex Gas & Basic Petrochemicals has awarded the contract to build and operate its first cogeneration power plant. The plant would be built at the Nuevo Pemex gas processing complex in Tabasco state and have capacity of 300MW.

History

Abengoa, S.A. was founded in Seville in 1941.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
