The Abviva, Inc financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your

company's decision-making processes.

In the part that describes Abviva, Inc competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Abviva, Inc business.

About Abviva, Inc

Abviva, Inc., a biomedical corporation, focuses on the development and commercialization of breast cancer diagnostic and therapeutic products derived from a human biological secreted protein, Mammastatin.

The company is in the process of commercializing a breast cancer diagnostic technology licensed from the University of Michigan. The Mammastatin Serum Assay (MSA) is a breast cancer diagnostic risk assessment test developed by the company's wholly owned subsidiary, Biomedical Diagnostics, LLC, (BDx). The MSA also demonstrated that women with breast cancer had no detectable levels of Mammastatin or very low levels. The MSA would initially be offered as a CLIA certified clinical laboratory service test to physicians and clinics through BDx.

The company has an option to develop cancer therapeutic products from the patented Mammastatin technology. It holds a minority interest in Prion Developmental Laboratories, Inc. (PDL). PDL developed rapid and inexpensive diagnostic tests to detect Transmissible Spongiform Encephalopathies, such as Mad Cow Disease in cattle. The company holds a 38% equity interest in PDL.

Principal Products

Biomedical Diagnostics, LLC

Biomedical Diagnostics, the company's wholly owned subsidiary based in Ann Arbor, Michigan, is in the process of developing proprietary breast cancer screening products. The initial product development effort is the commercialization of the Mammastatin Serum Assay (MSA), which is a result of a license from the University of Michigan and to be used as a broad population based screening diagnostic test for breast cancer.

The company signed an option with the University of Michigan in February 2007 to license the Mammastatin technology and patent portfolio from the University of Michigan.

Prion Developmental Laboratories

The company holds approximately a 38% equity interest in Prion Developmental Laboratories, Inc. (PDL), which is a private company specializing in the development of rapid and inexpensive diagnostic tests to detect Transmissible Spongiform Encephalopathies, such as Mad Cow Disease in cattle and Chronic Wasting Disease in deer and elk.

In February 2008, the company entered into a Letter of Intent whereby it would sell its interests in Prion Developmental Laboratories, Inc. and its rights under its agreement with the SEC Receiver, here collectively and individually referred to as 'Business,' to a company to be formed by unnamed business executives.

History

Abviva, Inc. was founded in 1994. The company was formerly known as Flexx Realm, Inc. and changed its name to Biolabs, Inc. in 1998; and to Genesis Bioventures, Inc. in 2001. Further, the company changed its name to Abviva, Inc. in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
