Abstracts

ACADIA Pharmaceuticals, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ACADIA Pharmaceuticals, Inc. and its competitors. This provides our Clients with a clear understanding of ACADIA Pharmaceuticals, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about ACADIA Pharmaceuticals, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ACADIA Pharmaceuticals, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ACADIA Pharmaceuticals, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ACADIA Pharmaceuticals, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ACADIA Pharmaceuticals, Inc. business.

About ACADIA Pharmaceuticals, Inc.

ACADIA Pharmaceuticals Inc., a biopharmaceutical company, focuses on the development and commercialization of small molecule drugs for the treatment of central nervous system disorders.

Product Candidates

Pimavanserin

Pimavanserin is a small molecule product candidate that the company discovered and, in collaboration with Biovail, is in the process of developing for neurological and psychiatric indications in the United States and Canada. Pimavanserin is a new chemical entity that can be taken orally as a tablet once-a-day. Pimavanserin selectively blocks the activity of the 5-HT_{2A} receptor, a drug target that plays a role in the treatment of various neuropsychiatric disorders.

Pimavanserin as a Treatment for Parkinson's Disease Psychosis: The company is in Phase III development with pimavanserin as a treatment for Parkinson's disease psychosis. Pimavanserin treats the psychosis in patients with Parkinson's disease

without impairing motor function.

Pimavanserin as an Adjunctive Therapy for Schizophrenia: The company's collaborative partner, Biovail, has initiated a Phase III development program with pimavanserin as an adjunctive therapy for schizophrenia.

Pimavanserin as a Treatment for Alzheimer's Disease Psychosis: The company is in Phase II development with pimavanserin as a treatment for Alzheimer's disease psychosis.

AGN-XX/YY

In collaboration with Allergan, the company has discovered and is in the process of developing a class of small molecule product candidates for the treatment of chronic pain. Allergan has conducted several Phase II trials in this program.

AC-262271

The company has discovered and, in collaboration with Allergan, is in the process of developing AC-262271, a small molecule product candidate for the treatment of glaucoma. Using its proprietary drug discovery platform, the company identified a subtype of the muscarinic receptors that controls intraocular pressure and discovered lead compounds that selectively activate this target.

AM-831

The company has discovered and, in collaboration with Meiji Seika, is in the process of developing AM-831, a small molecule product candidate for the treatment of schizophrenia and related disorders. These compounds combine muscarinic m1 agonism with actions on both dopamine and serotonin receptors. The company intends to co-develop AM-831 in collaboration with Meiji Seika through completion of proof-of-concept clinical studies.

Other Product Candidates

The company has used its proprietary drug discovery platform to discover additional product candidates. This includes its ER-beta program where the company has discovered compounds that may possess anti-inflammatory and neuroprotective properties and may have the ability to slow down the progression of Parkinson's

disease.

Collaborations

The company is in the process of developing a portfolio consisting of four product candidates including, pimavanserin, for three separate neurological and psychiatric indications in collaboration with Biovail Laboratories International SRL (Biovail), a subsidiary of Biovail Corp. In addition to pimavanserin programs, the company has a product candidate in Phase II development for chronic pain and a product candidate in Phase I development for glaucoma, both in collaboration with Allergan, Inc. (Allergan), and a program in IND-track development in collaboration with Meiji Seika Kaisha, Ltd. (Meiji Seika).

In October 2010, ACADIA Pharmaceuticals Inc. announced that it has entered into an agreement with Biovail Laboratories International SRL, pursuant to which ACADIA and BLS have agreed to conclude their previously established collaboration to develop and commercialize pimavanserin in the United States and Canada.

Competition

The company's product for the treatment of Parkinson's disease psychosis would compete with off-label use of antipsychotic drugs, including Seroquel, marketed by Astra-Zeneca, and clozapine, a generic drug.

The company's products for the treatment of schizophrenia would compete with Zyprexa, marketed by Eli Lilly; Risperdal, marketed by Johnson & Johnson; Abilify, marketed jointly by Bristol-Myers Squibb and Otsuka Pharmaceutical; Seroquel; and clozapine.

The company's products for the treatment of chronic pain would compete with Neurontin and Lyrica, each marketed by Pfizer; and Cymbalta, marketed by Eli Lilly.

The company's products for the treatment of glaucoma would compete with Xalatan, marketed by Pfizer, and Lumigan and Alphagan, marketed by Allergan.

History

ACADIA Pharmaceuticals Inc. was founded in 1993.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
