## Abstracts

Acadian Mining Corporation Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Acadian Mining Corporation and its competitors. This provides our Clients with a clear understanding of Acadian Mining Corporation position in the Industry.

The report contains detailed information about Acadian Mining Corporation that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Acadian Mining Corporation. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Acadian Mining Corporation financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Acadian Mining Corporation competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Acadian Mining Corporation business.

## **About Acadian Mining Corporation**

Acadian Mining Corporation engages in the exploration, acquisition, and development of lead, zinc, gold, and barite properties primarily in the Province of Nova Scotia.

The company's wholly owned subsidiary, ScoZinc Limited, owns the lead-zinc property and mill known as the Scotia Mine situated in Gays River, Nova Scotia. The company also focused on developing five advanced gold properties: the Beaver Dam, Tangier, Forest Hill, Fifteen Mile Stream, and Goldenville properties, which form the core holdings of the Scotia Goldfields Project.

The company holds a 29.12% equity interest in Royal Roads Corp. (Royal Roads). Royal Roads' principal asset is a 16,075 hectare mineral property known as the Tulks North property which is located in the centre of the Buchans base metal camp in central Newfoundland and Labrador. Royal Roads wholly owned subsidiary, Buchans River Ltd., holds a prospective property portfolio in the Buchans camp.

### **ScoZinc Project**

The ScoZinc Project includes the Scotia Mine located approximately 50 kilometres northeast of the Halifax Regional Municipality, Nova Scotia and 1 kilometre east of the

community of Gays River in Halifax County.

The Scotia Mine property is subject to Mineral Lease 90-1, which consists of 615 hectares of mineral rights, including land with exploration potential for zinc/lead mineralization and 728 hectares of land ownership. The Scotia Mine property also includes five exploration licences in the general vicinity of the Scotia Mine. In total, the 91 claims cover 3,640 acres (1,473 hectares). These licences are located along strike from the Scotia Mine deposit and include favourable host rocks similar to that at the mine site. As of December 31, 2008, approximately 1,300 diamond core drill holes have been drilled on the Scotia Mine property.

### Scotia Goldfield's Project

**Beaver Dam:** Beaver Dam is the primary focus of the company's gold program as it is potentially a key property in its central processing and servicing strategy. The Beaver Dam property consists of 36 contiguous mineral exploration claims held 100% by the company under exploration licence 05920 and covers approximately 582.5 hectares of surface area in Halifax County, Nova Scotia, approximately 135 kilo meters east of the provincial capital city of Halifax.

**Forest Hill:** The Forest Hill property consists of 173 contiguous mineral claims within 6 mineral exploration licences. The Forest Hill property includes a 100% interest in these claims. The Forest Hill property totals 2803 hectares of land located in Guysborough County, Nova Scotia.

**Tangier:** The Tangier Project consists of 153 mineral claims within 11 mineral exploration licences. The company holds a 100% interest in these claims and acquired the mineral rights as part of its exploration, and evaluation programs to identify new gold targets on the Tangier Project. The Tangier Project totals 2,475 hectares of land located in Halifax County, Nova Scotia.

### Goldenville

The company holds an undivided 100% right title and interest in all exploration licences comprising the Goldenville Project. The Goldenville Project is located in Guysborough County, Nova Scotia, approximately 135 kilometres east of Halifax and 60 kilometres south of Antigonish.

### Fifteen Mile Stream

The Fifteen Mile Stream Property is located in eastern Halifax County in central Nova Scotia. The Fifteen Mile Stream Property consists of 3 mineral licences held by 6179053 Canada Incorporated (6179053). It holds a 50% interest in 6179053. Various additional licences held by the company surround the licences of 6179053 Canada Limited and cover lands considered prospective for additional mineralization.

## Getty

The Getty deposit was the focus primary focus of the company's zinc-lead exploration in 2008. The Getty deposit is located at Gays River, Halifax County.

## History

The company was founded in 2000. It was formerly known as Tempus Corp. and changed its name to Acadian Gold Corporation in 2003. Further, it changed its name to Acadian Mining Corporation in 2007.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
