Abstracts

Accentia Biopharmaceuticals, Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Accentia Biopharmaceuticals, Inc. and its competitors. This provides our Clients with a clear understanding of Accentia Biopharmaceuticals, Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Accentia Biopharmaceuticals, Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Accentia Biopharmaceuticals, Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Accentia Biopharmaceuticals, Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Accentia Biopharmaceuticals, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Accentia Biopharmaceuticals, Inc. business.

About Accentia Biopharmaceuticals, Inc.

Accentia Biopharmaceuticals, Inc., a biopharmaceutical company, engages in the development and commercialization of late-stage, targeted therapeutic clinical products.

The company has three products in or entering Phase 3 clinical trials. All three products modify the immune system to treat disease.

SinuNase

The company's product candidate, SinuNase, is being developed as a treatment for chronic sinusitis (CS) which the medical establishment also refers to as chronic rhinosinusitis (CRS), which is a chronic inflammatory condition of the paranasal sinuses that among others, results in nasal congestion, facial pain and pressure, nasal discharge, and headaches. SinuNase is an amphotericin B suspension that is self-administered into a patient's nasal cavity for the treatment of CS. It commenced the first of two Phase 3 clinical trials for SinuNase for patients who have recurrent CS whose disease severity has warranted surgical intervention for CS.

BiovoxID

The company's product candidate, BiovaxID is under development by its subsidiary, Biovest International Inc. BiovaxID is a patient-specific anti-cancer vaccine to treat follicular non-Hodgkins lymphoma, or follicular Non-Hodgkin's Lymphoma (NHL). BiovaxID is derived from a patient's own cancer cells and is designed to utilize the power of the patient's immune system to recognize and destroy cancerous lymphoma cells while sparing normal cells. It produces this vaccine by extracting the patient's tumor cells and then replicating and purifying the antigen that is present on the surface of the patient's own tumor cells. Biovest is conducting a pivotal Phase 3 clinical trial for BiovaxID in patients with the indolent, or low-grade, form of B-cell follicular NHL.

Revimmune

The company's product candidate, Revimmune, is being developed as a treatment for multiple sclerosis (MS), an autoimmune disease that affects the central nervous system (CNS). Revimmune therapy consists of approximately four consecutive days of in-patient or out-patient treatment with an ultra-high intensity, short-course of an intravenous formulation of an approved drug (cyclophosphamide). This treatment seeks to reboot a patient's immune system, thereby eliminating the autoimmunity which is characteristic of MS. In July 2007, the Company filed a pre-IND submission with the FDA for the commencement of a Phase 3 clinical trial and conducted pre-IND meetings.

The company is a vertically-integrated commercial enterprise with demonstrated competencies in the identification, development, regulatory approval, pricing, reimbursement, managed care contracting, manufacturing, and sales and marketing of biopharmaceuticals and medical devices. It markets pharmaceutical products through its Accentia Pharmaceuticals division, which has a dedicated specialty sales force. The company's pharmaceutical product consulting business provides a range of services, including product candidate selection, outcomes research on the economic profiles of pharmaceuticals and biologics, pricing and market assessment on these products, reimbursement strategies and various services designed to expedite clinical trials to companies and institutions in the pharmaceutical, biotechnology, and medical markets as well as for its internal use. Its instrument business manufactures equipment used in the production of cells and other biologics based on the hollow-fiber production method and includes its newly introduced automated instrument, AutovaxID.

Specialty Pharmaceutical Products

The company has a specialty pharmaceutical business, Accentia Pharmaceuticals,

through which it sells Respi-TANN, Zinotic products and Sinutest test. In addition to its marketed products, it has AllerNase being developed for it by a third party. AllerNase is a novel formulated suspension of an intranasal topical steroid indicated for the treatment of allergic and non-allergic rhinitis.

Respi-TANN is a family of antitussive and other ingredients, including a decongestant for temporary relief of cough and nasal congestion accompanying respiratory tract conditions associated with the common cold, influenza, sinusitis, and bronchitis. Zinotic

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
