The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ACE Limited business.

About ACE Limited

ACE Limited, a holding company, operates as a property and casualty insurance and reinsurance company. The company provides a range of products and services to commercial and individual customers in approximately 140 countries.

Segments

The company operates through the following business segments: Insurance – North American, Insurance – Overseas General, Global Reinsurance, and Life.

INSURANCE – NORTH AMERICAN

The Insurance – North American segment comprises its P&C operations in the U.S., Canada, and Bermuda. This segment includes the operations of ACE USA (including ACE Canada), ACE Westchester Specialty Group (ACE Westchester), ACE Bermuda, and various run-off operations.

ACE USA, its retail business, operates through several insurance companies using a network of offices throughout the U.S. and Canada. These operations provide an array of P&C, A&H, and risk management products and services to a group of commercial and non-commercial enterprises and consumers. ACE USA is this segment's main

operation.

ACE Westchester specializes in the wholesale distribution of excess, surplus, and specialty P&C products. ACE Bermuda provides commercial insurance products on an excess basis to a client base, covering risks that are low in frequency and high in severity.

The run-off operations include Brandywine Holdings Corporation (Brandywine), Commercial Insurance Services (CIS), residual market workers' compensation business, pools and syndicates not attributable to a single business group, and other exited lines of business.

Products

ACE USA primarily distributes its insurance products through a limited number of brokers. In addition to using brokers, certain products are also distributed through channels such as general agents, independent agents, managing general agents, managing general underwriters, alliances, affinity groups, and direct marketing operations. These products include general liability, excess liability, property, workers' compensation, commercial marine, automobile liability, professional lines (D&O and E&O), medical liability, aerospace, and A&H coverages, as well as claims and risk management products and services. ACE USA also has established internet distribution channels for some of its products.

ACE USA's on-going operations are organized into distinct business units, each offering specialized products and services targeted at specific markets.

ACE Risk Management offers a range of customized casualty products to respond to the needs of mid- to large-size companies, including national accounts, irrespective of industry. These programs are designed to help insureds address the significant costs of financing and managing risk for workers' compensation and general and auto liability coverages. A variety of program structures are offered to support each client's risk financing needs including: large deductible captives, third-party rent-a-captives, funded deductibles, and net present value and other risk financing structures.

ACE Global Underwriting Group, specializing in global programs and specialty coverages, provides comprehensive risk management programs and services to mid- to large-size U.S.-based companies, not-for-profit, and government entities. The group's main products include global property, corporate risk property, inland marine, foreign

casualty, commercial marine, energy, and aerospace. In addition, this group provides specialty personal lines coverage for recreational marine distributed through a network of specialty agents.

ACE Casualty Risk offers products and services to a range of customers, ranging from middle market to the large multinational clients. Main coverages offered by ACE Casualty Risk include umbrella and excess liability, environmental risk for commercial and industrial risks, and wrap-up programs, which protect contractors and project sponsors with multi-risk coverage on large single- and multi-location construction projects. Small businesses can purchase workers' compensation coverage through this unit's Internet-based ACE Complete product.

ACE Professional Risk (Professional Risk) provides management liability and professional liability

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
