company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Ackermans & Van Haaren NV competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Ackermans & Van Haaren NV business.

## **About Ackermans & Van Haaren NV**

Ackermans & van Haaren NV operates as a diversified company. The company engages in contracting, dredging and concessions; real estate and related services; financial services; private equity; and energy and materials.

### Segments

Contracting, dredging, and concessions

The company engages in the contracting, dredging, and concessions with DEME; Rent-A-Port; Algemene Aannemingen Van Laere; and Nationale Maatschappij der Pijpleidingen.

DEME is a marine engineering company. Its core activities include dredging and civil marine engineering. DEME's complementary activities include environmental engineering (treatment of soil and sludge), services for the oil and gas sector, and extraction of construction aggregates from the sea. DEME's areas of operation include Europe, Africa, South America, the Middle East, Australia, South America, India, and the Mediterranean.

Rent-A-Port is a specialist in port engineering and is also a co-investment partner in greenfield port projects.

Rent-A-Port operates in two main activities: engineering activities, such as design, concept studies, soil survey, project management, and supervision of execution; and coordination, such as co-investments and syndications in large-scale port developments.

Together with its subsidiaries, Algemene Aannemingen Van Laere is active in various industries, which include office buildings, public buildings and flats, civil engineering, marine engineering, environmental projects, industrial projects, car parks, restoration, steel constructions and PPP. Van Laere is active in Belgium, the Netherlands, Luxembourg, and in the north of France.

Nationale Maatschappij der Pijpleidingen (NMP) specializes in the construction and management of pipelines for the transport of industrial gases and products for the petrochemical industry.

#### Real estate and related services

The company provides real estate and related services with Leasinvest Real Estate, a real estate investment trust; Extensa Group, a land and real estate developer; Cobelguard, active in the security market; and Groupe Financière Duval, active in development and operating of real estate, leisure parks, and housing for the elderly in France.

#### Financial services

The company provides financial services with Bank Delen, an independent private asset manager in Belgium; Bank J.Van Breda & C, a bank for entrepreneurs and liberal professions in Belgium; and the insurance group BDM-Asco.

#### Private equity

The company engages in the private equity operations with Sofinim and GIB Group. Sofinim is an investment company in Belgium specialized in private equity. Sofinim provides development capital to medium-sized and larger companies.

#### History

Ackermans & van Haaren NV was incorporated in 1924.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
