Abstracts

ACS Motion Control, Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between ACS Motion Control, Ltd. and its competitors. This provides our Clients with a clear understanding of ACS Motion Control, Ltd. position in the Industry.

The report contains detailed information about ACS Motion Control, Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for ACS Motion Control, Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The ACS Motion Control, Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes ACS Motion Control, Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of ACS Motion Control, Ltd. business.

About ACS Motion Control, Ltd.

ACS Motion Control Ltd. engages in the development, manufacture, and sale of motion control products. The motion control products are integrated into other equipment and machinery, such as medical scanners, imaging systems, semiconductor manufacturing equipment, electronic testing and inspection stations, and printing machinery.

The company develops, produces, and markets multi-axis motion controllers and control modules (motion controllers with integrated drives) that provide motion control for automated equipment. It offers both standard products and customized products tailored directly to the customer's needs. The company's products are integrated into various original equipment manufacturer (OEM) applications, including semiconductor manufacturing, electronic assembly and testing, medical imaging, packaging, and digital printing.

Products

The company offers various types of motion control products. Its products are designed to include features that are targeted at the specific markets that it serves, such as support for high resolution encoders, advanced control algorithms, communication to the host, multi-axis synchronization, multi-tasking programming environment, and a set

of software development and support tools.

The MC4U Series of High Performance Controllers: The MC4U control module includes a plugged-in controller, up to eight built-in drivers, and power supplies in one box. It supports Ethernet and serial communication.

The SPIIPLUS Series of High Performance Controllers: The SPiiPlus Series includes the SPiiPlus-PCI four and eight axis motion controllers; the SPiiPlus-CM two and three axis control module; and the SPiiPlus SA four and eight axis stand alone motion controller. The SPiiPlus-PCI is a PC plug-in card. It supports PCI communication, Ethernet, and serial communication. The SPiiPlus-CM control module includes the controller, the drivers, and the power supply in a box and supports Ethernet and serial communication. The SPiiPlus SA is a controller which supports Ethernet and serial communication.

Line of SB Series of Controllers and Control Modules: This line includes the SB214PC two and four axis PC plug-in controller; the SB214SA two and four axis controller with serial communication; and the SB1381 and SB1391 single axis control modules that include the controller, the driver, and a power supply, and supports serial communication.

Line of Library Programmable Motion Controllers: This line includes the 5000 PC plug-in 1-3 axis stepper controller; the 565X PC plug-in 2-4 axis servo controller; and the 595X PC104 2-4 axis universal controller.

Customized Products: The company also specially designs products for certain OEM customers. Such products include 16 axis control modules for miniature motors, dynamic auto-focus control system, and drivers for electronic assembly robots.

Customers and Markets

The company's customer base includes international OEMs, such as Philips Medical Systems and GE Medical Systems, both of which produce medical scanners; Applied Materials Ltd., a subsidiary of Applied Materials, Inc. and a producer of automatic optical inspection systems for the semiconductor industry; Orbotech Ltd., a producer of optical inspection systems for the printed circuit industry and for flat panel displays; and Anorad Corporation, a Rockwell Automation subsidiary and producer of turnkey positioning systems used by various OEMs that produce manufacturing and inspection systems for the semiconductor and electronics industry. It also offers its products to a

network of distributors in Europe, Israel, North America, and Asia which sell its products to their local customers and provide the customer with training, installation, and service.

Suppliers

The company's suppliers include Performance Motion Devices (PMD) and National Semiconductor.

Competitors

The company's competitors include Galil Motion Control, Delta-Tau Data Systems, and Motion Engineering, Inc.

History

The company was founded in 1985. It was formerly known as ACS-Tech 80 Ltd. and changed its name to ACS Motion Control Ltd. in 2006.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
