The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Actelion Ltd. business.

About Actelion Ltd.

Actelion, Ltd., a biopharmaceutical company, engages in the discovery, development and commercialization of treatments to serve high unmet medical needs. The company operates primarily in Switzerland, Europe, the Middle East, the United States, Africa, and Asia Pacific.

Products

Tracleer

Actelion's first product Tracleer (bosentan), a dual endothelin receptor antagonist (ERA), is an oral treatment for pulmonary arterial hypertension (PAH), a chronic, life-threatening disorder which is characterized by abnormally high blood pressure in the arteries between the heart and lungs. Tracleer works by blocking the detrimental affects of endothelin, a substance secreted by the endothelium, a single layer of cells covering the inner surface of blood vessels.

Actelion markets Tracleer through its own subsidiaries in key markets worldwide, including the United States, the European Union as well as Canada, Israel, Australia and Switzerland.

Zavesca

Zavesca provides a novel approach to the treatment of Gaucher's disease by inhibiting the formation of glucosylceramide, an important element in the formation of these lipids. An added advantage of Zavesca is that it is an oral treatment and therefore may be more suitable for those patients who are unable to receive enzyme replacement therapy.

Zavesca

Zavesca is indicated for the oral treatment of mild to moderate type 1 Gaucher disease, when enzyme replacement therapy is unsuitable.

Collaborations

Actelion, Ltd. and Roche Holding AG have entered into a collaboration to jointly develop and commercialize Actelion's selective S1P1 receptor agonist, an immunomodulator with the potential for once-a-day oral dosing. The compound is being developed in Phase I. The two companies intend to jointly develop and commercialize this compound for multiple autoimmune disorders. The S1P1 collaboration covers both the selective S1P1 receptor agonist in Phase I as well as any other selective S1P1 receptor agonists resulting from Actelion's research efforts in the field.

The company and GlaxoSmithKline plc have entered into a worldwide collaboration (excluding Japan) for Actelion's almorexant, an orexin receptor antagonist in phase III development with first-in-class potential as a treatment for primary insomnia.

History

Actelion, Ltd was founded in 1997.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
