## Abstracts

Actions Semiconductor Co., Ltd. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Actions Semiconductor Co., Ltd. and its competitors. This provides our Clients with a clear understanding of Actions Semiconductor Co., Ltd. position in the [Semiconductor Industry](#).

The report contains detailed information about Actions Semiconductor Co., Ltd. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Actions Semiconductor Co., Ltd.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Actions Semiconductor Co., Ltd. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Actions Semiconductor Co., Ltd. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Actions Semiconductor Co., Ltd. business.

### **About Actions Semiconductor Co., Ltd.**

Actions Semiconductor Co., Ltd., a semiconductor company, engages in the design, development, and marketing of integrated platform solutions, including system-on-a-chip products (SoCs), firmware, software development tools and reference designs to portable media player manufacturers of portable media player manufacturers, brand owners, and value-added distributors.

#### Products and Technology

The company provides various solutions along the portable media player design and manufacturing value chain. For most of its value-added distributor customers and certain contract manufacturer and brand owner customers, the company provides its SoCs and solution development kits (SDKs). It provides its total solutions that consist of its SoCs, SDKs, as well as reference designs that include detailed specifications of other required components and references to the providers of those components, which together allow these customers to assemble a portable media player.

**System-on-a-Chip (SoC):** The company's SoCs are integrated circuits that incorporate a digital signal processor, a micro controller unit, embedded memory, codec, a power

management unit and other components. Its SoCs are designed to be utilized for portable media players with upgradeable firmware. Its multi-voltage SoC design supports audio encoders, digital rights management, USB and Bluetooth connectivity and audio post-processing effects, such as equalization and stereo expansion. The company's SoC products also include on-chip memory, controllers for color liquid crystal display, and analog components, including digital-to-analog converters, phase lock loops and USB transceivers.

**Solution Development Kits:** The company's solution development kits (SDKs) include the embedded firmware code, software tools and documentation necessary to utilize its SoCs in portable media players. Its firmware utilizes an embedded structure design with standard interface that allows its customers to pick and choose functionalities and add new device drivers. The company's manufacturing software tools also allow its customers to mass produce their products based on its turnkey process.

**Reference Designs:** The company's solutions include its SoCs, SDKs and reference designs that include specifications of other required components and references to the providers of those components, which, together, allow those customers to assemble a portable media player.

## Customers

The company sells its products in China and worldwide through distribution arrangements and through its direct sales force to value-added distributors, contract manufacturers and brand owners. In 2009, its major customers included GMI Technology; Steed Digital Technology; Sino-Mos Electronics; Boton-tech; and WPI.

## Competition

The company faces competition from SoC platform providers, such as ALi, Anyka, Buildwin, Freescale/SigmaTel, Grain Media, Rockchips, Samsung, Silicon Motion, Sino Wealth, Sunplus, and Telechips.

## History

Actions Semiconductor Co., Ltd. was founded in 2001.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

### Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

### **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
