Abstracts

Admiralty Holding Company Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Admiralty Holding Company and its competitors. This provides our Clients with a clear understanding of Admiralty Holding Company position in the Industry.

The report contains detailed information about Admiralty Holding Company that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Admiralty Holding Company. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Admiralty Holding Company financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Admiralty Holding Company competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Admiralty Holding Company business.

About Admiralty Holding Company

Admiralty Holding Company, a development stage company, engages in locating and the recovery of cargoes from historic shipwrecks. The Company is also evaluating the potential application of its technology for assisting domestic governmental agencies in locating and retrieving unexploded marine ordnance and weapons.

The Company conducts its business principally through an operating subsidiary, Admiralty Corporation. Its other subsidiary includes Admiralty Marine Operations, Ltd.

Shipwreck Search and Recovery Technology

The Company has designed and developed a proprietary detection technology, ATLIS, to locate, quantify and differentiate among precious metals in a marine environment. The Company has completed the initial testing phase of its technology (in the laboratory and in the ocean) and is building the ATLIS field units for use in shipwreck search and recovery operations.

The Company has improved the marine search capabilities associated with its ATLIS technology by positioning itself to acquire an improved Remotely Operated Vehicle (ROV) to be integrated with the ATLIS technology. This capability is being developed

through a contractual association with Nova Marine Exploration, Inc. and its subsidiary NovaRay, Inc. (NRI) developers of the Nova Ray ROV. The Nova Ray ROV operates in approximately 9 knot currents under tow, yet also has plenty of payload capabilities.

Additionally, the Company expects to be able to adapt the ATLIS technology to the Nova Ray ROV and deploy the adapted ROV to study in detail those anomalies which correlate with its historic research to determine whether shipwreck recovery activities are warranted.

Strategic Alliances and Joint Ventures

The Company entered into an agreement with Georgia Tech Research Corporation, which serves as the contracting arm for the Georgia Institute of Technology (collectively, Georgia Tech). This agreement grants to Georgia Tech a license of the Company's ATLIS technology for conducting research and development activities towards the development of that technology for use in locating unexploded land-based ordnance.

The Company entered into various agreements to survey sites using the Company's research vessel, the R/V New World Legacy. Using this vessel, the Company has completed survey work for GCS Technologies, LLC in its permit area off Key West, Florida and for Underwater Treasure Associates, L.L.P. in its permitted area southwest of Galveston, Texas.

In 2005, the Company entered into a joint venture agreement with Corazon & Corazon, a company engaged in providing charitable services in Caribbean countries and elsewhere, to arrest and potentially recover artifacts from a shipwreck. In March 2005, the Company, pursuant to the joint venture, arrested, through an order from a federal district court, a 30 square mile area in international waters off the coast of Honduras.

In 2005, the Company entered into an agreement with Captain Carl Fisser, a veteran of shipwreck treasure search and recovery operations, and Triton Quest, Inc. (Triton), an investment group affiliated with Captain Fisser, to conduct historic shipwreck exploration activities, principally in international waters.

Shipwreck Search and Recovery Vessels

The Company acquired the R/V New World Legacy, a 110-foot, 169-ton ship (the Ship) built for historic shipwreck search and recovery operations in the Caribbean. The Ship accommodates 21 persons, including a crew of 4. It has been outfitted with dive-support

equipment and special marine survey and recovery equipment, including a 'fish tow' Geometrics 882 magnetometer, two hand-held cesium magnetometers, sub-bottom mapping electronic equipment and software, world wide nautical chart software, two 18-foot Boston Whalers, a heavy-duty crane, air compressors for diving tanks, and a full dive air Nitrox system. The Company had utilized the Ship for its Pedro Bank operations and is using it for certain other survey and recovery projects, including, in particular, Project Orange and the Dead Eye Site.

History

Admiralty Holding Company was founded in 1971.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
