Abstracts

Admiralty Resources NL Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Admiralty Resources NL and its competitors. This provides our Clients with a clear understanding of Admiralty Resources NL position in the [Metals and Mining](#) Industry.

The report contains detailed information about Admiralty Resources NL that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Admiralty Resources NL. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Admiralty Resources NL financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Admiralty Resources NL competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Admiralty Resources NL business.

About Admiralty Resources NL

Admiralty Resources NL engages in the exploration and development of mineral deposits. The company's principal activities are the mining evaporates in Argentina and iron ore in Chile. The company's business consists of five separate projects based in Australia and South America. The company focuses on the development of its two major mining interests in Chile (Cia Minera Santa Barbara) and Argentina (Rincon Salar).

Properties

Cia Minera Santa Barbara Iron Ore Project - Chile

The company has acquired a 49% interest in Cia Minera Santa Barbara, a company formed to exploit the iron ore resources located near Vallenar in Chile. Cia Minera Santa Barbara owns and would operate nine existing iron ore mine sites containing alluvial, hard rock (vein) and stockpiled iron ore fines. The Cia Minera Santa Barbara mines are located in Northern Chile seven kilometres south west of Vallenar and 55 kilometres from the commercial port of Huasco Bay. The mines cover an area in excess of 19 square kilometers. The nine mines have a resource of approximately 41 million tonnes of iron ore with an Fe content averaging between 60% and 67%. Approximately

2.2 million tonnes of iron ore fines are stockpiled at the Japonesa site and a further 0.8 million tonnes at Mirador.

Rincon Salar Lithium, Borate and other minerals - Argentina

The Rincon Salar tenements cover an area of approximately 250 square kilometres. This is a major multi-elemental brine resource, located in the Salta Province of Argentina and close to two of the producers of lithium and potassium in the world. The Rincon Project is located in north-western Argentina near the Chilean border. It is a hyper saline lake, brine enriched in lithium, magnesium, potash, and boron. The project is situated at an elevation of 3,700 metres within the Antofalla-Pocitos volcanic rift valley in the high Andean Plains. This ponded evaporate deposit is estimated to contain a recoverable brine tonnage of 1.45 billion within a closed basin area and to a depth of 60 metres. Main resources to be extracted are: Lithium chloride, Potassium Chloride, Sodium Sulphate, and Boric Acid and Borates.

The Pyke Hill Project

The Pyke Hill Project in Western Australia comprises a single granted Mining Lease which covers an area of 5.37 square kilometre. The project is located approximately 40km southeast of the Murrin Murrin Nickel Operation operated by Minara Resources Limited and is considered prospective for a high grade nickel laterite deposit. The company has a joint venture option agreement in place with Cougar Metals NL (Cougar). The Pyke Hill Project has the potential to contain shallow to moderate depth zones of high-grade nickel-cobalt laterite mineralization.

The Bulman Project

The Bulman Project is a Zinc and Lead oxide deposit located in southern Arnhem land in Australia's Northern Territory. The company holds mineral Lease Numbers 726 and 727 (Marumba) form the Bulman zinc and lead Project through wholly owned subsidiary Moonlight Mining NL. The company has an Exploration License Application (21384) for 637 sq kilometers of land that includes MLN 726 and 727.

Nilnav Orthopaedics

The company holds 10% interest in Nilnav Orthopaedics, which offers a surgical technique and patented toolset for minimally invasive, 'one-cut' incision hip replacements.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
