The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Adroit Resources Inc. business.

About Adroit Resources Inc.

Adroit Resources Inc., a junior exploration company, engages in finding and developing diamond and precious, and base metal resources. The company also explores for oil and gas in Texas, USA.

Properties

Temagami/Temiskaming Properties

The company explores for diamonds, gold, PGM, and base metals in the Temagami/Temiskaming area of north-eastern Ontario. Temagami North Property comprises 98 non-contiguous mining claim units in the New Liskeard/Cobalt kimberlite field in northeastern Ontario. Temagami East Property comprises 31 contiguous, mining claim units located near Temagami.

South Rift Property

The South Rift Property comprises 23 contiguous mining claim units near Temagami. The South Rift Property is located within the juncture of the northeast trending Grenville Front Tectonic Zone and the northwest trending Lake Timiskaming Structural Zone.

Niemetz Property

In 2007, Adroit Resources Inc. was granted an option to acquire a 100% legal and beneficial interest in and to eight contiguous mineral claims (24 units) covering approximately 368 hectares in Briggs Township, Ontario, generally known as the 'Niemetz' property. The Niemetz property is located 16 kilometres southwest of the town of Temagami, in Briggs Township.

Argentia Ridge Property

The company's land position in north-eastern Ontario includes 14 contiguous claims comprising 96 units. The property, named Argentia Ridge, is located within South Lorrain Township (Sudbury Mining Division, Ontario), and is located approximately 2.5 km south of the mining town of Silver Centre.

Simon Copper Property

The Simon Copper Property consists of 12 contiguous claims (92 units) covering 1,472 ha in Denbigh and Lyndoch townships, Southern Ontario Mining Division, Ontario, Canada.

West Hudson Property

The company, in 2008, completed a staking program for obtaining a land position in the Cobalt Camp, in Bucke and Coleman Townships in Ontario. 87 claim units have been staked in three claim blocks totaling 1392 hectares. These claims are known as a part of the Hudson Bay Mining Company Limited Property just north of the town of Cobalt, Ontario.

Red Vein Property

The company, in 2008, staked 216 claim units totaling 3456 hectares in one contiguous claim block in Kemp, Kelvin, and Natal Twps, Sudbury Mining Division, Ontario, Canada.

Central Italy Gold Project

The company's holdings in Central Italy total 5,083 hectares (ha), covering the following

permits: Poggio Petricci (769 ha), Poggio Fogari (749 ha), I Monti Property (355 ha), Podere La Banditella (381 ha), Poggio Carpinelle (1294 ha), Faggio Scritto (246 ha), Montauto (258 ha), Tafone Sud (340 ha), Poggio Monticchio (236 ha), and I Salaioli (455 ha).

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
