Abstracts

Advanced Viral Research Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Advanced Viral Research Corp. and its competitors. This provides our Clients with a clear understanding of Advanced Viral Research Corp. position in the Industry.

The report contains detailed information about Advanced Viral Research Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Advanced Viral Research Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Advanced Viral Research Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Advanced Viral Research Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Advanced Viral Research Corp. business.

About Advanced Viral Research Corp.

Advanced Viral Research Corp., a biopharmaceutical company, focuses on the discovery, development and commercialization of small molecule therapeutics that address medical needs for various degenerative conditions.

The company develops its products focusing on the treatment of systemic symptoms, such as cachexia (body wasting), loss of appetite and lethargy experienced by patients with advanced malignant cancer, HIV-AIDS, cardiovascular disease, sepsis, viral infections, and other diseases, as well as to treat as an aid in wound healing. Its also develops its products for use as an anti-inflammatory in conditions, such as rheumatoid arthritis; and palliative agent to minimize certain toxicities associated with chemo or immunotherapies.

Products

AVR118: The company's primary product, AVR118 is a cytoprotective drug composed of a mixture of protein and ribonucleic acid components that it is developing to alleviate symptoms associated with clinical cachexia, such as anorexia and weight loss, as well as other serious complications associated with cancer, HIV-AIDS, chronic heart failure, sepsis and other diseases.

AVR123: AVR123 is a form of AVR118 designed for dermatology applications. Based on early pre-clinical data, AVR123 may be used as an adjuvant therapy for the management of wounds and treatment of other dermal conditions. AVR123 is in Phase II clinical trials.

Other Compounds: AVR147, a compound acquired in December 2007, is a potent inhibitor of a validated cancer target known as a proteasome. Proteasomes are enzyme complexes that exist in all cells and play a role in degrading proteins involved in the cell cycle, growth of new blood vessels (angiogenesis), cell adhesion, cytokine production, apoptosis, and other cellular processes. The company is undertaking limited pre-clinical development of AVR147.

AVR168, a compound acquired in December 2007, is a natural product that inhibits a member of a family of motor proteins that are responsible for the assembly and function of microtubules during cell division. These proteins are important for intracellular transport and cell division in all eukaryotes. The company is undertaking limited pre-clinical development of AVR168.

Competition

The company identifies competition from Bristol-Myers Squibb; Serono Laboratories Inc.; Johnson & Johnson; Genentech, Inc.; and Smith and Nephew.

History

Advanced Viral Research Corp. was founded in 1984.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
