Abstracts

Aegis Assessments Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Aegis Assessments Inc. and its competitors. This provides our Clients with a clear understanding of Aegis Assessments Inc. position in the Industry.

The report contains detailed information about Aegis Assessments Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Aegis Assessments Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Aegis Assessments Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Aegis Assessments Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Aegis Assessments Inc. business.

About Aegis Assessments Inc.

Aegis Assessments, Inc., a development stage company, develops law enforcement, military and commercial security applications by productizing its wireless communications technologies, as well as sells those products to both the government and private sectors in the United States. The company's product, the Aegis SafetyNet RadioBridge, allows various two-way radios to be interconnected regardless of frequency, modulation or encryption scheme. The company is also partnered with the National Institute of Justice's Office of Law Enforcement Technology Commercialization.

Products

The Aegis SafetyNet RadioBridge: The SafetyNet RadioBridge provides radio interoperability for emergency responders. The Aegis SafetyNet RadioBridge allows two-way radios and various other communication devices, such as cellular telephones, to be interconnected regardless of frequency, modulation or encryption. The lightweight, portable device provides immediate on-site interoperability between multiple radio systems operating on different frequencies for first responders, commercial facilities and government agencies. The RadioBridge allows the incident commander to control communications at the scene by assigning up to 4 independent talk groups. An audio output allows incident communications to be recorded.

The Guardian System: The SafetyNet Guardian System is a portable wireless tracking device that uses radio-frequency identification, or RFID, technology to monitor the location and physical condition of emergency personnel at the scene of an emergency incident. The SafetyNet Guardian System includes helmet-mounted RFID tags that can be programmed to transmit personnel information including: name, rank, training, and other department-specific information. Features in development include bio-sensor monitors for heart rate, body temperature, and blood oxygen levels.

The Guardian System also uses wireless remote stations that are placed in high rise buildings or other large commercial infrastructure locations to provide facility managers and emergency responders with a wireless emergency management and communications system. The remote stations can include broadband video, audio, and two-way radio as well as chemical and air flow data from life safety devices that can be used to monitor, direct, communicate and share critical information with public safety agencies.

The Guardian System, for high-rise stairwells, provides infrared as well as regular imaging so that first responders can determine where to concentrate rescue personnel. The system for a particular building can be programmed to include a building floor plan and utility schematics to coordinate gas and electricity shut offs and the approach to emergency events.

Markets

The company markets its products to the U.S. government, public safety agencies, and private corporations.

History

Aegis Assessments, Inc. was founded in 2001.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
