Such information creates your awareness about principal trends of Aeon Co. Ltd. business.

About Aeon Co. Ltd.

Aeon Co., Ltd. engages in retail business with shopping mall development and operation. The company primarily operates in Japan, North America, and Asia.

Segments

The company separates its operations into four segments, which consist of General Merchandise Stores (GMS) and Other Retail Store Operations; Specialty Store Operations; Shopping Center (SC) Development Operations; and Service and Other Operations.

General Merchandise Stores and Other Retail Store Operations

The General Merchandise Stores and Other Retail Store Operations include mainly GMS, supermarket, convenience store, and department store operations. Stores in this segment offer various types of goods.

As of February 20, 2008, the company operated 606 GMS outlets. Its GMS outlets offer apparel, foodstuffs and household items in sales displays. It groups merchandise under categories, such as 'travel', 'walking', 'relaxation' and 'fitness'. The company also

operates 1,182 supermarkets and 3,082 convenience stores. It operates 68 GMS outlets and supermarkets in China and Southeast Asia.

Specialty Store Operations

The Specialty Store Operations include women's apparel, casual wear items for men and women, cosmetics and toiletries, and shoes. As of February 20, 2008, the company operated 4,504 specialty stores.

Shopping Center Development Operations

The Shopping Center Development Operations provide store development and rental services.

Service and Other Operations

The Service and Other Operations include credit card operations, consumer financing, amusement facility operator, restaurants and store maintenance. As of February 20, 2008, the company had 1,659 stores in service and other operations.

Acquisitions

In December 2007, the company acquired 89.9 % of the issued shares of Kohyo Co., Ltd., which operates a supermarket business.

Significant Events

On July 22, 2009, Aeon Co. Ltd. announced it has formed a subsidiary to produce vegetables for sale in the Tokyo area. The Japanese retail giant's new unit, Aeon Agri Create Co., would grow vegetables, such as corn, cabbage and soybeans by leasing a 2.6-hectare field in Ushiku, Ibaraki Prefecture, northeast of Tokyo, starting in September.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
