Abstracts

AeroTelesis Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between AeroTelesis Inc. and its competitors. This provides our Clients with a clear understanding of AeroTelesis Inc. position in the Industry.

The report contains detailed information about AeroTelesis Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for AeroTelesis Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The AeroTelesis Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes AeroTelesis Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of AeroTelesis Inc. business.

About AeroTelesis Inc.

aeroTelesis, Inc., a development stage company, offers voice, data and video services. The company's targeted application markets include fixed and mobile wireless broadband, and satellite communications.

The company's technology partner, Photron Technologies, Ltd. (Photron) is the developer of a proprietary technology platform called Ultra Spectral Modulation (USM). aeroTelesis has the license from Photron to distribute USM-related products and services. Upon the completion of the development of USM, aeroTelesis intends to offer USM-related products and services to major satellite operators, system integrators and wireless service providers on a worldwide basis.

USM Technology

The company's main wireless technology platform is a proprietary modulation technology known as USM. USM is designed to substantially increase bandwidth competence. USM is distinct and unrelated to existing modulations standards, including those of Global System for Mobile communication (GSM) and Code Division Multiple Access (CDMA). USM represents an original and fundamental shift for wireless technology and the communications industry. Specifically, it is designed to increase

spectral competences in wireless applications and provide for high-speed and high-capacity networks, relative to existing broadband wireless technologies. USM can be applied in the satellite communication industry. USM technology could provide approximately 80 channels per Ku-band transponder, transmitting approximately 5 Mbps downstream in channels that are as narrow as 50 KHz wide.

USM Technology Licenses

The company, in May 2006, entered into a License Agreement with Photron Technologies, Ltd. for licensing of the USM technology. Pursuant to the 2006 License Agreement, the company has the right to acquire the license for USM, for each country or region.

The company, in February 2004, established a direct licensing relationship and agreement with the developer and manufacturer of the USM technology, Photron. Pursuant to the terms and conditions of the 2004 License Agreement, aeroTelesis was granted a license to utilize and deploy USM technology for use in wireless telecommunication services (applicable to all international markets without restrictions), such as wireless local loop and mobile cellular networks. The license to utilize and deploy the USM technology for these types of wireless telephony services was exclusive to aeroTelesis and Nations, on a country-by-country basis for each country that aeroTelesis enters and is able to secure the necessary government licenses and rights to deploy wireless telephony services.

USM Technology Cooperation & Development

In conjunction with the 2004 License Agreement, in March 2004, aeroTelesis and Photron have also entered into a Technology Cooperation and Development Agreement (the 'TC&D Agreement'). The primary focus of the TC&D Agreement is technology cooperation and development for USM products and systems that aeroTelesis intends to deploy in its target markets under its license from Photron.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
