Abstracts

Akela Pharma Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Akela Pharma Inc. and its competitors. This provides our Clients with a clear understanding of Akela Pharma Inc. position in the [Pharmaceuticals and Biotechnology](#) Industry.

The report contains detailed information about Akela Pharma Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Akela Pharma Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Akela Pharma Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Akela Pharma Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Akela Pharma Inc. business.

About Akela Pharma Inc.

Akela Pharma Inc., an integrated product development company, primarily focuses on therapeutics for pain utilizing drug delivery technologies.

Fentanyl TAIFUN – Break-through Cancer Pain

The company's lead product candidate is Fentanyl TAIFUN, a fentanyl formulation specifically designed to be delivered with its TAIFUN Multi-Dose Inhaler. The company is developing Fentanyl TAIFUN as an inhaled opioid analgesic for treatment of break-through cancer pain. The company has entered into an exclusive license and development agreement with Janssen with respect to the continuing development and commercialization of Fentanyl TAIFUN.

GHRH or Growth Hormone Release Hormone – Chronic Renal Failure

The company's GHRH is a patented synthetic analogue of the natural human growth hormone releasing hormone, and is classified as an NCE. The company's GHRH, which has completed Phase II trials, is targeted for the treatment of malnutrition associated with pre-dialysis stage chronic renal failure. The company completed a placebo-controlled Phase II trial in three centers in Europe, investigating the efficacy and safety

of GHRH for the treatment of malnutrition in patients with late pre-dialysis chronic renal failure.

EDACS – Opioid Abuse-Deterrent System

The company has developed an abuse-resistant delivery platform, EDACS, or Extruded Deterrence of Abusable Controlled Substances, to address opioid abuse. EDACS is manufactured by hot-melt extrusion of a homogeneously blended powder that can be formulated to provide various dosing options including once-a-day extended pain release.

CGRP or Calcitonin Gene Related Peptide – Asthma

The company's CGRP is a therapeutic that has been in development for the treatment of asthma.

Drug Delivery Technologies

The company has developed the following proprietary drug delivery technologies: TAIFUN dry powder multi-dose inhaler – Inhalation Technology; and EDACS (Extruded Deterrence of Abusable Controlled Substances) – Abuse Deterrent System.

Competition

Break-through Cancer Pain: The company's competitors include Cephalon, Inc.; YM Biosciences, Inc.; Aradigm Corporation; and Alexza Pharmaceuticals, Inc.

Abuse Deterrence: The company's competitors include Alpharma Inc.; Acura Pharmaceuticals Inc.; Purdue Pharma L.P.; Elite Pharmaceuticals Inc.; Egalet A/S; Pain Therapeutics Inc.; Durect Corporation; TheraQuest Biosciences, LLC; and Collegium Pharmaceutical Inc.

Asthma: The company's competitors include Merck & Co., Inc.; GlaxoSmithKline plc; Novartis AG; Genentech, Inc.; and Tanox, Inc.

Growth Hormone: The company's competitors include Conjuchem Inc., Aeterna Zentaris Inc., Sapphire Therapeutics Inc. and QLT Inc.

Inhalation Technology: The company's competitors include Skypharma Plc; Vectura

Group Plc; Ventaira Pharmaceuticals, Inc.; Aradigm Corporation; and Alkermes Inc.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
