term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Alamo Energy Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Alamo Energy Corp. business.

About Alamo Energy Corp.

Alamo Energy Corp., an exploration stage company, engages in the acquisition, exploration, development, and producing of oil and gas properties.

As of April 30, 2010, the company owned a 75% working interest in oil and gas properties in Frio County, Texas, a 16% working interest in certain oil and gas leases in Adair County, Kentucky, and farm-in and participation rights agreements in onshore oil and gas properties in the United Kingdom.

The Lozano Lease

The company's Lozano lease has three wells. It is located in Frio County, Texas.

Aimwell Agreement

In January 2010, the company entered into an agreement with Aimwell Energy Limited for the participation rights with regard to Aimwell's license to operation certain oil and gas properties located in the United Kingdom.

Taylor TDS Five Well Program

In March 2010, the company entered into an operating agreement with Boardman Energy Partners, LLC (Boardman), for the purchase of participation rights with regard to Boardman's operation of wells in the Taylor TDS Five Well Program located on the H.V. Taylor Lease in the Middle Eastern section of the Gradyville Quadrangle, Adair County, Kentucky, for the purpose of oil and gas exploration and development. Boardman is the operator of the project with control of all operations. The operating agreement provides for the company's purchase of fractional undivided working interests (Units) in the operation of the wells drilled and operated under the operating agreement.

WEJCO Agreement

In April 2010, the company entered into a participation agreement with WEJCO, Inc., located in Texas (WEJCO), to acquire participation rights in WEJCO's working interest in oil, gas and mineral leases represented by a leasehold estate and well in Brown County, Texas.

Participation Agreement with Allied Energy, Inc.

In May 2010, the company entered into a participation agreement with Allied Energy, Inc., pursuant to which it acquired an undivided 50% working interest in the Florence Valentine Lease and a working interest and net revenue interest in the Valentine #1 re-entry well. This well is located on approximately 115 acres in Ritchie County, West Virginia within the Burning Springs Anticline.

History

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
