Abstracts

Albany International Corp. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Albany International Corp. and its competitors. This provides our Clients with a clear understanding of Albany International Corp. position in the [Heavy Machinery](#) Industry.

The report contains detailed information about Albany International Corp. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Albany International Corp.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Albany International Corp. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Albany International Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Albany International Corp. business.

About Albany International Corp.

Albany International Corp. engages in the production and sale of paper machine clothing and industrial doors worldwide.

Segments

The company operates through five segments: Paper Machine Clothing, Albany Door Systems, Engineered Fabrics, Engineered Composites, and PrimaLoft Products.

Paper Machine Clothing

The Paper Machine Clothing segment includes fabrics and belts used in the manufacture of paper and paperboard (PMC or paper machine clothing). The company designs, manufactures, and markets paper machine clothing for each section of the paper machine. It manufactures and sells paper machine clothing worldwide. PMC consists of large permeable and non-permeable continuous belts of custom-designed and custom-manufactured engineered fabrics that are installed on paper machines and carry the paper stock through each stage of the paper production process. Principal products in the PMC segment include forming, pressing and dryer fabrics, and process belts. A forming fabric assists in sheet formation and conveys the very wet sheet

through the forming section. Press fabrics are designed to carry the sheet through the press section, where water is pressed from the sheet as it passes through the press nip. In the dryer section, dryer fabrics manage air movement and hold the sheet against heated cylinders to improve drying. Process belts are used in the press section to increase dryness and improve sheet properties, as well as in other sections of the machine to improve runnability and enhance sheet qualities. The company sells its PMC products directly to its customer end-users, which are paper industry companies, which operate in multiple regions of the world.

Albany Door Systems

The Albany Door Systems (ADS) segment designs, manufactures, sells, and services industrial doors worldwide, for a range of interior, exterior, and machine protection industrial applications. The business segment also delivers aftermarket sales and service. ADS sells directly to customer end-users in certain markets, such as Sweden and Germany, while in other markets, such as the United States, it sells primarily through distributors and dealers.

Engineered Fabrics

The Engineered Fabrics (EF) segment serves various industries that use fabrics and belts for industrial applications other than the manufacture of paper and paperboard. It involves in the sale to the nonwovens industry, which include the manufacture of diapers, personal care and household wipes; and to building products markets, which includes the manufacture of fiberglass-reinforced roofing shingles. It also sells to markets adjacent to the paper industry, and to the tannery and textile industries. The company generally markets EF products directly to its customers.

Engineered Composites

The Engineered Composites segment (AEC) provides custom-designed advanced composite structures and textile preforms to customers in aerospace and other high-tech industries.

PrimaLoft Products

The PrimaLoft Products segment includes sales of insulation for outdoor clothing, gloves, footwear, sleeping bags, and home furnishings. This segment has sales operations in the United States, Europe, and Asia, through which it sells products

produced by third-parties according to the company's proprietary specifications.

Customers

Albany Door Systems provides door solutions to industrial and commercial customers. The doors are designed for applications in which frequent use requires fast opening and closing. Albany Door Systems also provides aftermarket service and support for high-performance and other dock and door products from 16 sales and service centers located in Europe and Australia.

The Engineered Fabrics business supplies to the nonwovens industry (which includes the manufacture of products, such as diapers, personal care and household wipes, and fiberglass-reinforced roofing shingles), the wood and cement-based building products industry and the pulp industry.

Albany Engineered Composites serves primarily the aerospace industry, with custom-designed composite and advanced composite parts for static and dynamic applications.

PrimaLoft Products synthetic down is marketed to customers in high-end retail home furnishings and performance outerwear applications.

History

Albany International Corp. was founded in 1895.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
