About Alfresa Holdings Corp.

Alfresa Holdings Corp. (the company) was established in 2003. The company provides a full-line assortment made by all pharmaceutical producers to the customers. The company will proceed with various business developments related to the medical care and healthcare with pharmaceutical wholesaling as the core business.

The company provides customer support from the perspective of distribution of goods and distribution of information by supplying high quality information related to pharmaceuticals, in addition to pharmaceutical merchandises, in a timely and appropriate manner.

Azwell Inc. and Fukujin Co., Ltd. established the joint holding company, Alfresa Holdings Corporation. Both Azwell Inc. and Fukujin Co., Ltd. have been engaged in an extensive development of businesses in the fields of medical and nursing cares as healthcare purveyors.

AZWELL Inc

AZWELL Inc. was formed in 1939. AZWELL INC.'s business activities include wholesale of pharmaceuticals, diagnostic reagents, medical devices and devices, etc.;

Manufacture and sales of pharmaceuticals, diagnostic reagents, surgical sutures, medical devices, etc.; and Import and export of pharmaceuticals, pharmaceutical materials, chemical products, medical devices, surgical sutures, etc.

Products

NESCO Surgical Suture: NESCO Surgical Suture, excellent quality surgical suture, is available with various kinds of suture and needle combinations. Suture bulk materials are also available for the surgical suture manufacturers.

AZWELL Auto PAF-AH: AZWELL Auto PAF-AH, which is an accurate and convenient assay kit for the estimation of serum or plasma PAF-AH activity, is available now. It is the first available PAF-AH assay kit, which does not require both radioisotopes or any pretreatment of sample because it is unaffected by albumin and a variety of esterases in sample. It can also be used with an automatic analyzer, so the customer can estimate the activities of hundreds of samples for an hour.

Fukujin Co., Ltd

Fukujin Co., Ltd. was founded in 1938, Fukujin is a wholesaler of pharmaceutical products.

Pharmaceuticals Delivery: Fukujin is a wholesaler, which handles ethical and over-the-counter pharmaceuticals, diagnostic agents, medical equipment and medical materials produced by approximately 300 manufacturers both in Japan and overseas. Fukujin offers a fast and precise delivery service to its customers, who consist of hospitals, general practitioners, and licensed pharmacists.

Information Support Service: In addition to operating a pharmaceuticals information website and a magazine, Fukujin has also established channels to provide feedback on pharmaceutical products from hospitals and clinics to the drug manufacturers. Fukujin's role in information dissemination, centered on the efforts of the Fukujin Customer Support Center, is highly regarded among medical practitioners.

Consulting: Fukujin is ready to provide advice on everything from the startup of new hospitals and other facilities, through administration improvement programs and all matters related to spinning off drug dispensing operations. Fukujin also provides detailed support in the field of management through various seminar and lecture programs.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
