The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-

term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Alkermes, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Alkermes, Inc. business.

About Alkermes, Inc.

Alkermes, Inc., a biotechnology company, develops and manufactures medicines to improve patients' lives. The company's pipeline includes extended-release injectable and oral products for the treatment of prevalent, chronic diseases, such as central nervous system (CNS) disorders, reward disorders, addiction, diabetes, and autoimmune disorders.

Products and Development Programs

RISPERDAL CONSTA

RISPERDAL CONSTA is a long-acting formulation of risperidone, a product of Janssen, and is an atypical antipsychotic approved for the treatment of schizophrenia and for the treatment of bipolar I disorder. The medication uses its proprietary MEDISORB injectable extended-release technology to deliver and maintain therapeutic medication levels in the body through one injection every two weeks. RISPERDAL CONSTA is marketed by Janssen Pharmaceutica International (Janssen) and is manufactured by the company. The Pharmaceuticals and Medical Devices Agency in Japan approved RISPERDAL CONSTA for the treatment of schizophrenia. RISPERDAL CONSTA is approved for the treatment of schizophrenia in approximately 85 countries and

marketed in approximately 60 countries.

VIVITROL

The company has developed VIVITROL, an extended-release MEDISORB formulation of naltrexone, as the once-monthly injectable medication for the treatment of alcohol dependence. It has licensed the right to commercialize VIVITROL for the treatment of alcohol dependence and opioid dependence in Russia and other countries in the Commonwealth of Independent States (CIS) to Cilag GmbH International (Cilag). VIVITROL is approved for the treatment of alcohol dependence in Russia. The company is also developing VIVITROL for the treatment of opioid dependence, a serious and chronic brain disease characterized by compulsive, prolonged self-administration of opioid substances that are not used for a medical purpose. It has completed a phase 3 clinical trial of VIVITROL for the treatment of opioid dependence. The company markets and sells VIVITROL in the U.S.

BYDUREON

The company is collaborating with Amylin Pharmaceuticals, Inc. (Amylin) on the development of a once weekly formulation of exenatide, called BYDUREON, for the treatment of type 2 diabetes. BYDUREON is an injectable formulation of Amylin's BYETTA (exenatide) and is being developed with the target of providing patients with a treatment option. BYETTA is an injection administered twice daily. The company intends to initiate a Phase 2 study of a monthly dose suspension formulation of exenatide.

ALKS 33

ALKS 33 is an oral opioid modulator that the company is developing for the potential treatment of addiction and other CNS disorders. It has completed two clinical trials of ALKS 33. In November 2009, the company initiated a phase 2 clinical study to assess the safety and efficacy of multiple doses of ALKS 33 in patients with alcohol dependence and to further define the clinical profile of ALKS 33.

ALKS 37

The company is developing ALKS 37, an orally active, peripherally-restricted opioid antagonist for the treatment of opioid-induced constipation (OIC). The company has completed a randomized, double-blind, placebo-controlled phase 1 clinical study

designed to assess the safety, tolerability and pharmacokinetics of a single oral administration of 5 ascending doses of ALKS 37, from 1 mg to 100 mg, in 40 healthy volunteers. In April 2010, the company commenced a multicenter, randomized, double-blind, placebo-controlled, multidose study designed to evaluate the efficacy, safety, and tolerability of ALKS 37 in approximately 60 patients with OIC.

ALKS 36

The company intends to develop ALKS 36, which is intended to consist of a co-formulation of an opioid analgesic and ALKS 37, for the treatment of pain without the side effects of constipation.

ALKS 9070

ALKS 9070 is a once-monthly, injectable, sustained-release version of aripiprazole for the treatment of schizophrenia. ALKS 9070 uses its proprietary LinkeRx product platform. Aripiprazole is commercially available under the name ABILIFY for the treatment of a number of CNS disorders.

ALKS 6931

ALKS 6931 is a long-acting form of a TNF receptor-FC fusion protein for the treatment of rheumatoid arthritis and related autoimmune diseases. ALKS 6931 uses the MEDIFUSION technology licensed from Acceleron Pharma, Inc. (Acceleron). ALKS 6931 is commercially available under the name ENBREL.

ALKS 7921

ALKS 7921, the second candidate from the LinkeRx platform, is a once-monthly, injectable, extended-release version of olanzapine for the treatment of schizophrenia. Olanzapine is commercially available under the trade name ZYPREXA (olanzapine). Alkermes is engineering ALKS 7921 to prevent early, inadvertent release of free olanzapine into systemic circulation, and to provide another valuable option for patients and physicians to manage schizophrenia.

Collaborative Arrangements

The company and the Rensselaer Polytechnic Institute (RPI) entered into a license agreement granting the company rights to a family of opioid receptor compounds

discovered at RPI. These compounds represent an opportunity for the company to develop therapeutics for a range of diseases and medical conditions, including addiction, pain and other CNS disorders.

Customers

The company's product, VIVITROL, is sold directly to pharmaceutical wholesalers, specialty pharmacies, and a specialty distributor. Its major customers are McKesson Corporation; AmerisourceBergen Drug Corporation; Cardinal Health; and Caremark L.L.C.

Competition

The company's competitors include Forest Laboratories, Inc.; Odyssey Pharmaceuticals, Inc.; Duramed Pharmaceuticals, Inc.; Bristol-Myers Squibb Pharmaceuticals Ltd.; and Mallinckrodt, Inc., a subsidiary of Tyco International Ltd.

History

Alkermes, Inc. was founded in 1987.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
