The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of All World Resources Corporation business.

About All World Resources Corporation

Wide E Convergence Technologies Americas Corporation (WECTAC) provides a platform and consulting services for interactive distant learning (IDL) in the United States and Canada.

WECTAC is a dynamic technology corporation focused on training and education. WECTAC offers its IDL solution utilizing the Train-Need platform. Its revolutionary solution is empowering associations, corporations, colleges and universities to educate in ways not previously possible. WECTAC empowers clients to achieve their mission by optimizing their investment in their e-learning infrastructure. The company's technology allows its clients to deploy IDL solutions across their organization.

The company's services are provided within their IDL, a learning management system platform, to better equip clients to make informed e-learning decisions. The company's technology allows companies associations, and educational institutions of any size to develop educational solutions that span organizational, physical and geographic barriers.

Training Services

The company offers clients training programs on Train-need software, as well as a collection of training courses.

The company offers various interactive training courses, including; Computer Basics; Javascript Basics; SQL Basics; Basic English; Intermediate English; Speed Calculations – Basic; Basic Finance for non-finance executives; Marginal Costing; Investment Rules - selecting a good company.

Software Solutions

Train-need offers an enterprise-wide platform to meet all e-learning needs for the Fortune 1000 companies. This web based solution enables a presenter/communicator/trainer to deliver live and on-demand interactive sessions to be relayed from a studio to various participants regardless of their locations. This software platform also enables all participants that are registered for course materials to appear for an examination from their remote locations.

Train-need system modules include - Train-need Administrator; Train-need Instructor; and Train-need Participant.

Train-need Administrator: Train-need Administrator is a web based module equipped with a robust database, used by administrators and authorized personnel to manage the administration, registration and examination modules. It is also capable for accessing students' performance and generating all desired reports.

Train-need Instructor: Train-need Instructor is a web module used by instructors/presenters/communicators to conduct live sessions in a studio where there is need for a classroom setting or there is a need for a subject matter expert. Through this module the instructor/presenter can respond to the messages sent by one or all of the participants. The instructor/presenter can also chat with the participants during a live session.

Train-need Participant: Train-need Participant is a web based module equipped with a robust database, used by participants/students and authorized personnel to view live and on demand sessions. This module enables the participant to chat in a live session with the Instructor, who is conducting sessions from the studio and also to send messages for a recorded session, thus increasing the interactivity in the session. The participant can also appear for examinations, scheduled for at their convenience.

History

Wide E Convergence Technologies Americas Corporation was founded by Vincent Ramoutar.

The above Company Fundamental Report is a half-ready report and contents are subject to change.

It means that we have all necessary data in our database to prepare the report but need **2-3 days** to complete it. During this time we are also updating the report with respect to the current moment. So, you can get all the most recent data available for the same price. Please note that preparation of additional types of analyses requires extra time.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
