Abstracts

Alliance Holdings GP, L.P. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Alliance Holdings GP, L.P. and its competitors. This provides our Clients with a clear understanding of Alliance Holdings GP, L.P. position in the [Energy](#) Industry.

The report contains detailed information about Alliance Holdings GP, L.P. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Alliance Holdings GP, L.P.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Alliance Holdings GP, L.P. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Alliance Holdings GP, L.P. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Alliance Holdings GP, L.P. business.

About Alliance Holdings GP, L.P.

Alliance Holdings GP, L.P., through its subsidiaries, produces and markets coal primarily to utilities and industrial users in the United States. It produces a range of steam coal with varying sulfur and heat contents. Alliance GP, LLC, serves as the general partner of the company. The company's principal subsidiaries include Alliance Resource Management GP, LLC and Alliance Resource Partners, L.P. (ARLP Partnership).

As of December 31, 2009, the ARLP Partnership had approximately 647.2 million tons of coal reserves in Illinois, Indiana, Kentucky, Maryland, Pennsylvania, and West Virginia. The ARLP Partnership operates nine underground mining complexes in Illinois, Indiana, Kentucky, Maryland, and West Virginia. The ARLP Partnership's mining activities are conducted in three geographic regions referred to in the coal industry as the Illinois Basin, Central Appalachian, and Northern Appalachian regions.

Mining Operations

Illinois Basin Operations

The ARLP Partnership's Illinois Basin mining operations are located in western

Kentucky, southern Illinois, and southern Indiana. The ARLP Partnership operates six mining complexes in the Illinois Basin.

Dotiki Complex: The ARLP Partnership's subsidiary, Webster County Coal, LLC (Webster County Coal), operates Dotiki, which is an underground mining complex located near the city of Providence in Webster County, Kentucky. The Dotiki complex produces high-sulfur coal. Dotiki's preparation plant has throughput capacity of 1,300 tons of raw coal an hour.

Warrior Complex: The ARLP Partnership's subsidiary, Warrior Coal, LLC (Warrior), operates an underground mining complex located near the city of Madisonville in Hopkins County, Kentucky. Warrior produces high-sulfur coal. Warrior's new preparation plant has the throughput capacity of 1,200 tons of raw coal an hour.

Pattiki Complex: The ARLP Partnership's subsidiary, White County Coal, LLC (White County Coal), operates Pattiki, an underground mining complex located near the city of Carmi in White County, Illinois. The Pattiki complex produces high-sulfur coal. The preparation plant has throughput capacity of 1,000 tons of raw coal an hour.

Hopkins Complex: The Hopkins complex is located near the city of Madisonville in Hopkins County, Kentucky. Hopkins produces high-sulfur coal. Hopkins County Coal's preparation plant has throughput capacity of 1,200 tons of raw coal an hour.

Gibson Complex: The ARLP Partnership's subsidiary, Gibson County Coal, LLC (Gibson County Coal), operates the Gibson mine, an underground mining complex located near the city of Princeton in Gibson County, Indiana. The mine produces medium-sulfur coal. The preparation plant has throughput capacity of 700 tons of raw coal an hour.

River View Complex: The company's subsidiary, River View Coal, LLC, controls, through coal leases or direct ownership, approximately 120.8 million tons of probable high-sulfur coal in the Kentucky No. 7, No. 9, and No. 11 coal seams underlying properties located primarily in Union County, Kentucky, as well as certain surface properties, facilities, and permits. River View is an underground mining complex, which would have the capability of annually producing approximately 6.4 million tons. River View's preparation plant has throughput capacity of 1,800 tons of raw coal per hour.

Gibson South Reserves: The ARLP Partnership has partially completed the permitting process for the Gibson South reserves and evaluating the development of the project.

Central Appalachian Operations

The ARLP Partnership's Central Appalachian mining operations are located in eastern Kentucky. The ARLP Partnership operates two mining complexes in central Appalachia.

Pontiki Complex: The Pontiki complex is located near the city of Inez in Martin County, Kentucky. Its subsidiary, Pontiki Coal, LLC (Pontiki), owns the mining complex and controls the reserves, and its subsidiary, Excel Mining, LLC (Excel), conducts mining operations. The Pontiki complex produces low-sulfur coal. The preparation plant has throughput capacity of 900 tons of raw coal an hour.

MC Mining Complex: The MC Mining complex is located near the city of Pi

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
