## Abstracts

Allied Healthcare Products Inc. Fundamental Company Report provides a complete overview of the company's affairs. All available data is presented in a comprehensive and easily accessed format. The report includes financial and SWOT information, industry analysis, opinions, estimates, plus annual and quarterly forecasts made by stock market experts. The report also enables direct comparison to be made between Allied Healthcare Products Inc. and its competitors. This provides our Clients with a clear understanding of Allied Healthcare Products Inc. position in the [Healthcare Equipment and Supplies](#) Industry.

The report contains detailed information about Allied Healthcare Products Inc. that gives an unrivalled in-depth knowledge about internal business-environment of the company: data about the owners, senior executives, locations, subsidiaries, markets, products, and company history.

Another part of the report is a SWOT-analysis carried out for Allied Healthcare Products Inc.. It involves specifying the objective of the company's business and identifies the different factors that are favorable and unfavorable to achieving that objective. SWOT-analysis helps to understand company's strengths, weaknesses, opportunities, and possible threats against it.

The Allied Healthcare Products Inc. financial analysis covers the income statement and ratio trend-charts with balance sheets and cash flows presented on an annual and quarterly basis. The report outlines the main financial ratios

pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Allied Healthcare Products Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Allied Healthcare Products Inc. business.

### **About Allied Healthcare Products Inc.**

Allied Healthcare Products, Inc. manufactures respiratory products used in the health care industry in a range of hospital and alternate site settings, including sub-acute care facilities, home health care, and emergency medical care.

#### **Product Lines**

The company's product lines include respiratory care products, medical gas equipment, and emergency medical products.

#### **Respiratory Care Products**

The company's respiratory care products include respiratory care/anesthesia products and home respiratory care products. Respiratory care products are used in the treatment of acute and chronic respiratory disorders, such as asthma, emphysema, bronchitis, and pneumonia.

**Respiratory Care/Anesthesia Products:** The company manufactures and sells a range of products for use in respiratory care and anesthesia delivery. These products include air

compressors, calibration equipment, humidifiers, croup tents, equipment dryers, and a line of respiratory disposable products, such as oxygen tubing, facemasks, cannulas, and ventilator circuits.

**Home Respiratory Care Products:** The company's line of home respiratory care products include aluminum oxygen cylinders, oxygen regulators, pneumatic nebulizers, portable suction equipment, and a line of respiratory disposable products.

### Medical Gas Equipment

The company's medical gas equipment group is broken down into three separate categories: construction products, regulation devices and suction equipment, and disposable cylinders.

**Construction Products:** The company's medical gas system construction products consist of in-wall medical system components, central station pumps and compressors, and headwalls. These products are typically installed during construction or renovation of a health care facility and are built in as an integral part of the facility's physical plant. The company's in-wall components, including outlets, manifolds, alarms, ceiling columns, and zone valves, serve a fundamental role in medical gas delivery systems. Central station pumps and compressors are individually engineered systems consisting of compressors, reservoirs, valves and controls designed to drive a hospital's medical gas and suction systems. The company's construction products are sold primarily to hospitals, alternate care settings, and hospital construction contractors.

**Regulation Devices and Suction Equipment:** The company's medical gas system regulation products include flowmeters, vacuum regulators, and pressure regulators, as well as related adapters, fittings, and hoses, which measure, regulate, monitor, and help transfer medical gases from walled piping or equipment to patients in hospital rooms, operating theaters or intensive care areas. Portable suction equipment is typically used when in-wall suction is not available or when medical protocol specifically requires portable suction. The company also manufactures disposable suction canisters, which are clear containers used to collect the fluids suctioned by in-wall or portable suction systems.

**Disposable Cylinders:** Disposable oxygen cylinders are designed to provide oxygen for short periods of time in emergency situations. The company markets filled disposable oxygen cylinders through industrial safety distributors and similar customers, principally to first aid providers, restaurants, industrial plants, and other customers that require

oxygen for infrequent emergencies.

## Emergency Medical Products

The company's emergency medical products provide patient resuscitation or ventilation during cardiopulmonary resuscitation or respiratory distress, as well as immobilization and treatment for burns. The emergency medical products are broken down into two categories, respiratory/resuscitator products and trauma patient handling products.

**Respiratory/Resuscitation Products:** The company's respiratory/resuscitation products include demand resuscitation valves, portable resuscitation systems, bag masks and related products, emergency transport ventilators, precision oxygen regulators, minilators, multilators, and humidifiers. It also markets a line of disposable and reusable bag mask resuscitators, which are available in various adult and child-size configurations. The company's autovent transport ventilator can meet various needs in different applications ranging from typical emergency medical situations to air and ground transport. To complement the family of respiratory/resuscitation products, the company offers a line of oxygen product accessories. This line of accessory products includes reusable aspirators, tru-fit masks, disposable cuffed masks, and related accessories.

**Trauma and Patient Handling Products:** The company's trauma and patient handling products include spine immobilization products, pneumatic anti-shock garments, and trauma burn kits. Spine immobilization products include a backboard that is designed for safe immobilization of injury victims and provides a means of emergency patient transportation and extrication. Its pneumatic anti-shock garments are used to treat victims experiencing hypovolemic shock. Its trauma burn kits contain a line of products for the treatment of trauma and burns.

## Sales and Marketing

The company sells its products primarily to hospitals, hospital equipment dealers, hospital construction contractors, home health care dealers, emergency medical products dealers, and respiratory care/anesthesia product distributors.

The company's products are sold in United States and worldwide. It has market presence in Canada, Mexico, Central and South America, Europe, the Middle East, and the Far East.

## History

Allied Healthcare Products, Inc. was founded in 1979.

## ANALYSIS FEATURES

### SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

### Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

### PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

## Key Factors Examined by PESTEL Analysis:

**Political** – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

**Economic** – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

**Sociological** – What cultural and societal aspects will work upon the demand for the business's products and operations?

**Technological** – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

**Environmental** – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

**Legal** – What laws and legislation will exert influence on the style the business is carried out?

## **IFE, EFE, IE Matrices**

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

## **Porter Five Forces Analysis**

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

## **VRIO Analysis**

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

## Reputation

### Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
