The report outlines the main financial ratios pertaining to profitability, margin analysis, asset turnover, credit ratios, and

company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Allied Nevada Gold Corp. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Allied Nevada Gold Corp. business.

About Allied Nevada Gold Corp.

Allied Nevada Gold Corp. engages primarily in the production of gold in the state of Nevada. The company also involves in the evaluation, acquisition, exploration, and advancement of gold exploration and development projects in the state of Nevada.

Operations

The company operates the Hycroft Mine and has various prospective exploration claims. As of May 15, 2009, it had proven and probable mineral reserves of 1.1 million ounces of gold and an aggregate land position of approximately 386 square miles (621 square kilometers).

Hycroft Mine

The company operates the wholly-owned Hycroft Mine, which is located 54 miles west of Winnemucca, Nevada. The Hycroft Mine is an open pit, heap leach gold mine that is expected to produce silver as a byproduct of the gold recovery process. The company holds 26 patented and 2,427 unpatented mining claims that constitute its Hycroft Mine Operating Property. The total acreage covered by these claims is approximately 49,000 acres with approximately 1,600 acres related to the patented claims.

Exploration Properties

The company's exploration properties portfolio consists of six advanced properties in Maverick Springs (45% joint venture interest with Silver Standard Resources Inc. (Silver Standard)), Mountain View, Hasbrouck, Three Hills, Wildcat, and Pony Creek/ Elliot Dome and approximately 100 earlier-stage exploration properties.

Maverick Springs: The Maverick Springs project is located in northeast Nevada at the southeast end of the Carlin Trend belt of gold-silver mineralization, approximately half-way between Elko and Ely, Nevada. The property consists of 246 claims with a total area of approximately 4,920 acres.

Mountain View: The Mountain View property is located in northwest Nevada near the Blackrock Desert. The property is approximately 15 miles northwest of Gerlach, Nevada in Washoe County; it straddles the boundary between the Squaw Valley and Banjo topographic quadrangles. The property consists of 128 claims with a total area of approximately 2,560 acres.

Hasbrouck: The Hasbrouck property is located in southwestern Nevada approximately 5 miles south-southwest of the town of Tonopah in Esmeralda County, Nevada, adjacent to U.S. Highway 95 and approximately half-way between Reno and Las Vegas. The Hasbrouck property is located approximately five miles south of Tonopah, Nevada. The property consists of 22 patented lode mining claims and 61 unpatented lode claims that cover an area of approximately 1,300 acres.

Three Hills: Three Hills is located in southwestern Nevada approximately 1 mile west of the town of Tonopah in Esmeralda County, Nevada, and approximately 4.5 miles northwest of the Hasbrouck property. Three Hills consists of 15 unpatented lode claims totaling approximately 201 acres.

Wildcat: Wildcat is located approximately 35 miles northwest of Lovelock and 26 miles south of the Hycroft Mine in Pershing County, Nevada. The project consists of 125 unpatented claims and 4 patented claims, comprising 2,500 acres.

Pony Creek/Elliot Dome Property: The Pony Creek/Elliot Dome Property is located in the Larrabee mining district of Elko County, Nevada. The property consists of 895 unpatented lode mining claims (approximately 17,900 acres).

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
