pertaining to profitability, margin analysis, asset turnover, credit ratios, and company's long-term solvency. This sort of company's information will assist and strengthen your company's decision-making processes.

In the part that describes Allied Security Innovations, Inc. competitors and the industry in whole, the information about company's financial ratios is compared to those of its competitors and to the industry. The unique analysis of the market and company's competitors along with detailed information about the internal and external factors affecting the relevant industry will help to manage your business environment. Your company's business and sales activities will be boosted by gaining an insight into your competitors' businesses.

Also the report provides relevant news, an analysis of PR-activity, and stock price movements. The latter are correlated with pertinent news and press releases, and annual and quarterly forecasts are given by a variety of experts and market research firms. Such information creates your awareness about principal trends of Allied Security Innovations, Inc. business.

About Allied Security Innovations, Inc.

Allied Security Innovations, Inc., through its wholly owned subsidiary, CGM Applied Security Technologies, Inc., manufactures and distributes indicative and barrier security seals, security tapes and related packaging security systems, protective security products for palletized cargo, physical security systems for tractors, trailers, and containers, as well as various authentication products.

The company also develops, assembles, markets, and installs computer systems which capture video, digitally captured images and scanned images, digitize the image, link the digitized images to text/data and store the image and text on a computer database which allows for transmitting the image and text by computer or telecommunication links to remote locations. The principal product of the company in this area is the Compu-Capture Law Enforcement Program, which is marketed to law enforcement agencies and prison facilities.

Products

The company, focusing primarily on deterrent technologies, designs and develops tamper evident devices, which when integrated into a security protocol; provide chain of

custody and/or proof of tampering for targeted assets.

The company has trade secret protection on its secure T.R.A.C. tape, Super Seals, Water Gum Tape and developed a Button Memory Seal and Sentry Sensor. It also has distribution rights on NAVATECH products and seals, and owns the rights to the patented ToppClip pallet security device. In addition, it provides authentication technology and products to clients to act as brand protection elements to finished goods. Its principal products include CGM-AST tapes, self-wound security tape, void labels and void tape for bag closure, SUPERSEALS, custom coated products, CGM-AST conductive inks and membrane switch components, EMAPS, locks, sentry sensor, and other representative items.

SUPERSEAL and self-voiding carton sealing tape, known as SECURE T.R.A.C. show a customized signature if attempts are made at removing them. If cut and resealed, SUPERSEAL further shows an 'opened' legend on the seal's center surface. The EMAPS or Electro-Magnetic Asset Protection System reflects entry by sending an electronic signals if cut. It also offers converted labels, seals, and money bags. It manufactures various adhesives, graphics, and die cut label configurations for companies whose logos always appear on the tape or label for security purposes. uses for this product and technology include such items as aircraft and truck seals; fiber and steel drum seals; motor vehicle inspection seals; pharmaceutical packaging; box or container closure seals; cash bag components; computer seals; validation devices; general security products; and law enforcement agencies.

Customers

The company's client base includes approximately 2000 national and international companies, including producers of high value items, such as perfumes, computers, silicon chips, jewelry, cash, and negotiable documents. The market for tamper evidence includes flavors, fragrances, foodstuffs, and components. The company's products are used by the U.S. Government agencies (DOD, TSA, DHS, and CBP) and foreign national governments, airlines, pharmaceutical clients for packaging, and clinical trials and multiple suppliers of electronics.

History

Allied Security Innovations, Inc. was founded in 1986.

ANALYSIS FEATURES

SWOT Analysis

SWOT, which stands for Strengths, Weaknesses, Opportunities and Threats, is an analytical framework that identifies the internal and external factors that are favorable and unfavorable for a company.

Enhanced SWOT Analysis

Enhanced SWOT is a 3x3 grid that arranges strengths, weaknesses, opportunities and threats into one scheme:

How to use the strengths to take advantage of the opportunities?

How to use the strengths to reduce likelihood and impact of the threats?

How to overcome the weaknesses that obstruct taking advantage of the opportunities?

How to overcome the weaknesses that can make the threats a reality?

Upon answering these questions a company can develop a project plan to improve its business performance.

PESTEL Analysis

PESTEL (also termed as PESTLE) is an ideal tool to strategically analyze what influence different outside factors – political, economic, sociocultural, technological, environmental and legal – exert on a business to later chart its long term targets.

Being part of the external analysis when carrying out a strategic assessment or performing a market study, PESTEL gives an overview of diverse macro-environmental factors that any company should thoughtfully consider. By perceiving these outside environments, businesses can maximally benefit from the opportunities while minimizing the threats to the organization.

Key Factors Examined by PESTEL Analysis:

Political – What opportunities and pressures are brought by political bodies and what is the degree of public regulations' impact on the business?

Economic – What economic policies, trends and structures are expected to affect the organization, what is this influence's degree?

Sociological – What cultural and societal aspects will work upon the demand for the business's products and operations?

Technological – What impact do the technological aspects, innovations, incentives and barriers have on the organization?

Environmental – What environmental and ecological facets, both locally and farther afield, are likely to predetermine the business?

Legal – What laws and legislation will exert influence on the style the business is carried out?

IFE, EFE, IE Matrices

The Internal Factor Evaluation matrix (IFE matrix) is a strategic management tool helping audit or evaluate major weaknesses and strengths in a business's functional areas. In addition, IFE matrix serves as a basis for identifying and assessing relationships amongst those areas. The IFE matrix is utilised in strategy formulation.

The External Factor Evaluation matrix (EFE matrix) is a tool of strategic management that is typically utilised to assess current market conditions. It is an ideal instrument for visualising and prioritising the threats and opportunities a firm is facing.

The essential difference between the above mentioned matrices lies in the type of factors incorporated in the model; whilst the latter is engaged in internal factors, the former deals exceptionally with external factors – those exposed to social, political, economic, legal, etc. external forces.

Being a continuation of the EFE matrix and IFE matrix models, the Internal External matrix (IE matrix) rests upon an investigation of external and internal business factors

integrated into one suggestive model.

Porter Five Forces Analysis

The Porter's five forces analysis studies the industry of operation and helps the company find new sources of competitive advantage. The analysis surveys an industry through five major questions:

What composes a threat of substitute products and services?

Is there a threat of new competitors entering the market?

What is the intensity of competitive rivalry?

How big is the bargaining power of buyers?

How significant is the bargaining power of suppliers?

VRIO Analysis

VRIO stands for Value, Rarity, Imitability, Organization. This analysis helps to evaluate all company's resources and capabilities and bring them together into one aggregate table that includes:

Tangible resources

Financial

Physical

Technological

Organizational

Intangible resources

Human

Innovation and Creativity

Reputation

Organizational capabilities

The result of the analysis gives a clear picture of company's competitive and economic implications, answering the questions if the resources mentioned above are:

Valuable?

Rare?

Costly to imitate?

Organized properly?
